

CH Centrifugal horizontal multistage pumps

The CH range of centrifugal multistage pumps are built to provide a high quality and reliable solution for applications that require high flow rates of up to 160 l/min and heads up to 62 metres.

The range includes 4 base pumps suitable for independent switching.

Application

The CH range of pumps are the ideal base unit for pressure boosting sets or for applications where long pipe runs or high heads may be involved.

The range is suitable for commercial or domestic use, pumping hot or cold water.

Features

- Self priming up to 5 m
- Quiet operation
- Easy to install

Materials

Body	Brass/stainless steel

All models have an enclosure rating of IPX5 and feature totally enclosed fan ventilated cooling.
 All models have thermal overload protection and are designed for continuous running for duties of 2.5 l/min and above.
 Although these pumps are self priming we recommend a footvalve/strainer is used if a suction lift is required.
