

“Peace of mind that my family have heat and hot water they can rely on”

A boiler that won't let you down or cost the earth.

Five years peace of mind that your family will have heat and hot water whenever they need it. How does that sound to you? How about if we could also cut your energy bills and help the environment too?

Baxi has been keeping families warm for more than 150 years. We've drawn on that know-how to create the Baxi Platinum Combi HE boiler. We're so confident you can trust its reliability we've backed it with a five-year parts and labour warranty*.

As for those cost savings... The Baxi Platinum Combi HE has the SEDBUK Band 'A' rating for efficiency – the highest level possible. That means it provides maximum heating and hot water performance with minimum running costs. So it could save you money on your heating bills and help the environment by using less fuel.

Why choose a high efficiency Combi boiler?

With a combination boiler (or combi as they're commonly called) you gain the convenience of instant hot water - at anytime. There are no hot water tanks. It simply heats the water as you use it. So it's a very efficient way to gain a sure supply of hot water while reducing bills. What's more, you won't run out - there's always hot water on tap.

Many options from Baxi

Whether your home has five radiators or 25, there is a Baxi Platinum Combi HE boiler capable of heating them. Choose from the 24kW, 28kW, 33kW or 40kW models. Each one is designed to look good wherever it's installed and has easy to use controls.

Talk to your Gas Safe registered installer (or visit www.baxi.co.uk for details of reputable names in your area). And benefit from a more efficient way to gain a trusted supply of home heat and hot water.

Key features & benefits:

- 5-year parts and labour warranty* for complete peace of mind
- SEDBUK Band A rated – burns less fuel meaning lower gas bills than traditional boilers and lower greenhouse gas emissions
- Easy to use controls
- Stylish design that suits any surroundings
- 40kW option for exceptional hot water

*Subject to registration and an annual service.

Note - Legislation: To meet Building Regulations, your heating system may need additional controls. After fitting, you should get a Building Regulations heating compliance certificate from Gas Safe to show the work is to the right standard. Keep this, as you may need it when you come to sell your house.

* The 3 degree fall back on concentric flues can be reduced to 1.5 degrees providing the flue system is adequately clamped in accordance with the installation instructions.
