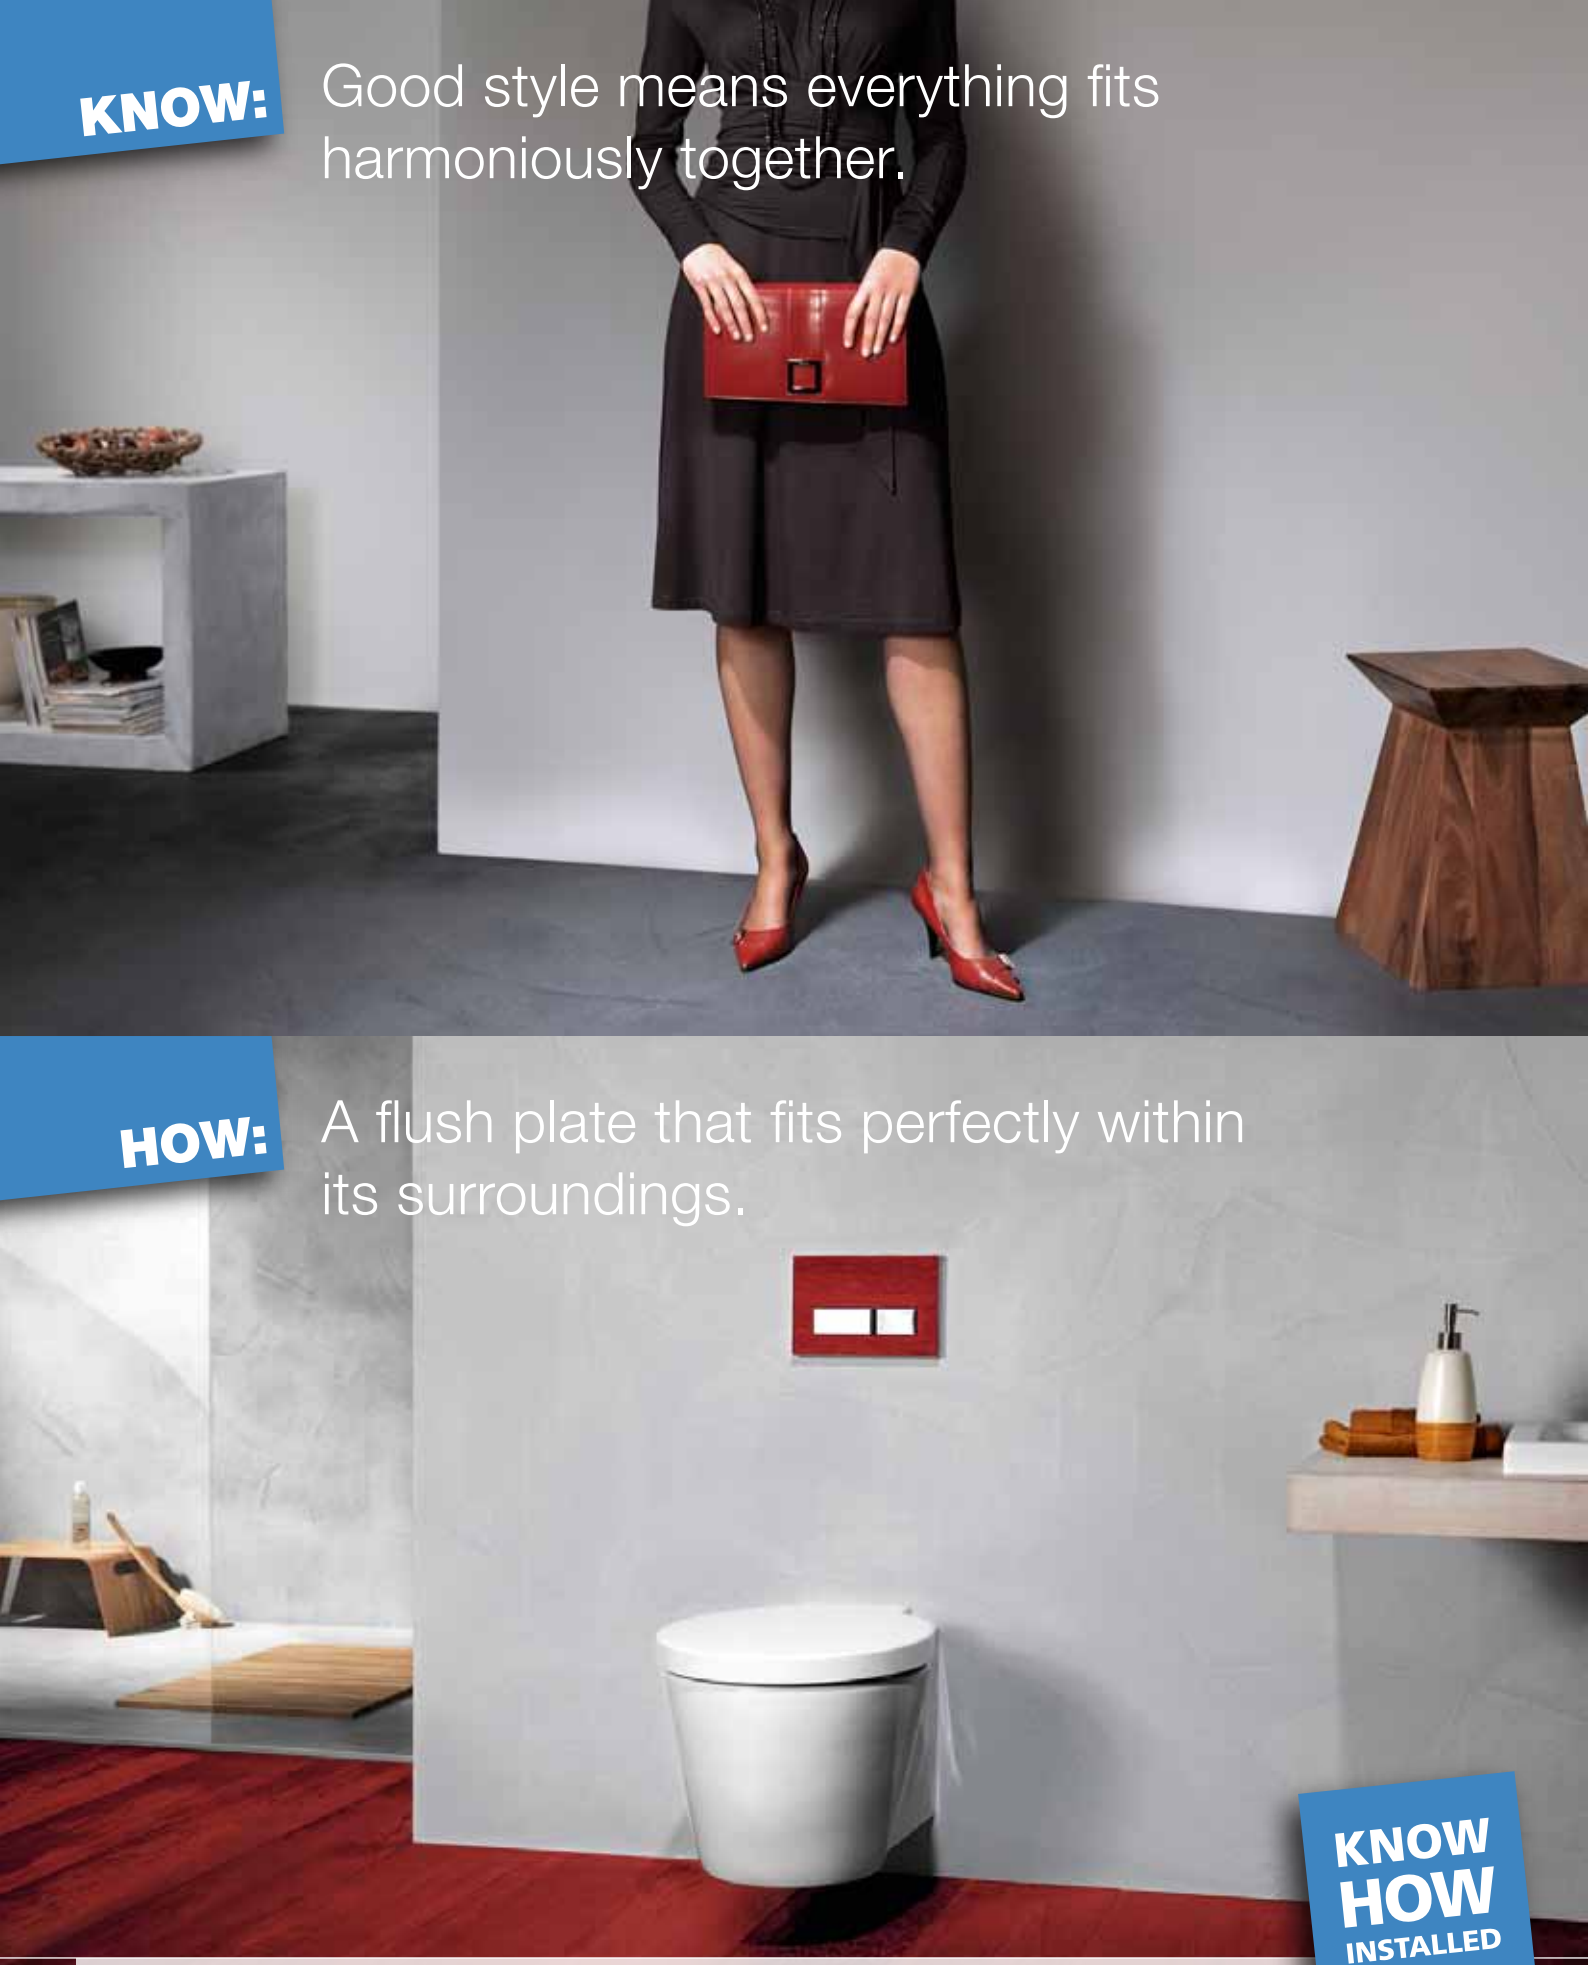
GEBERIT

Geberit Flush Plates and Flush Buttons

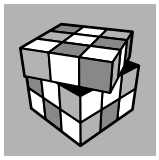
Hands-on design



Perfect, down to the smallest detail: design the Sigma50 flush plate from Geberit exactly the way you want it. In wood, stone or with photographs or drawings: the possibilities are endless.

Harmony Begins with the Detail

People who value a harmonious atmosphere don‘t leave the detail to chance. The primary function of flush plates and flush buttons are purely practical. They are, however, also part of the fittings which define the atmosphere of the room. For this reason, Geberit has paid special attention to the design of its flush plates. Versatile, durable, beautifully designed and easy to use, Geberit flush plates stand out against the rest.

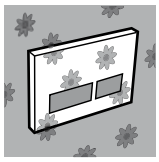


Versatile design

Geberit offers eleven flush plate designs in a variety of colours and finishes to complement all ceramic and tap finishes. The following pages show the range of designs available for both single and dual flush plates. Play with your creativity and design your perfect flush plate online (see below).

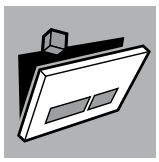
High-quality material

Manufactured from high quality materials including durable and UV-resistant plastic, die-cast zinc, stainless steel and glass, Geberit flush plates are reliable and hard-wearing.



Individuality

Geberit gives you endless design possibilities with the customisable Sigma50 flush plate allowing you to align the flush plate perfectly with the bathroom’s décor. Be it text or a favourite photo, give your creativity free reign with the Sigma50 model!



Fresh, clean and hassle free

The new insert for in-cistern blocks, available as an accessory for flush plates in the Sigma10, Sigma20 and Sigma50 design lines, keeps your WC hygienically clean without unsightly rim blocks. Inserting the blocks is childsplay: open; insert; close. Please visit www.geberit.co.uk for compatible disinfectant blocks.

You can now explore the Geberit product range at your leisure with the online flush plate design tool. For more information, www.geberit.co.uk/designtool
