

for bathrooms, cloakrooms & en suites

March 2012

2012 collection

introducing our latest exclusive collection

Over the past 21 years **HiB** has established itself as one of the market leaders in the design, manufacture and supply of quality and innovative products for bathrooms, cloakrooms and en-suites.

Our new collection features cutting-edge designs and carefully coordinated ranges of quality bathroom products, setting new standards in affordable personalised luxury.

We have built a reputation with value and service at the fore-front, and feel confident that products you may choose from this brochure will give you many years of lasting pleasure and satisfaction.

our philosophy

It is HiB's philosophy to focus on coordinated ranges that enable our customers to have a varied collection to select from, whether it be Mirrors, Cabinets, Bathroom Furniture, Washbasins, Ventilation or Lighting.

new focus

Our latest range includes many new and contemporary products, incorporating our commitment to excellence, design & technology and the meeting of all relevant standards and regulations.

ventilation

stylish bathroom **ventilation**

*Our designer range of **bathroom ventilation** fans are a stylish and practical solution. We offer a full range of extractor fans and accessories where design, quality and efficiency combine to deliver value for money.*

What is bathroom ventilation?

- + Ventilation can simply be described as air circulation.
- + Extraction of stale, overheated and contaminated air.
- + Supply and distribution of fresh air.
- + Providing healthy and comfortable conditions in the bathroom.

Why do you need bathroom ventilation?

- + Prevent build up of condensation - condensation can lead to mould production, stale smells and poor air quality.
- + Existing vents are noisy and unattractive and often an afterthought.
- + There are few other options in the bathroom market that offer high quality, designer ventilation.

features

Our new range of ventilation fans come with a range of extra features.

- + Adjustable timer
- + Adjustable humidity sensor
- + Low energy
- + Ultra quiet
- + Illuminated

We offer the following mounting options:

Ceiling mounted fan

Inline bathroom fans

An inline fan is where the fan is remotely sited within the loft space and is connected to the fascia and external wall grill by the supplied flexible ducting.

Features

- + Built-in energy saving 3W LED bulb
- + High-powered electric motor for efficient air extraction
- + Only 37 decibels

Illuminated bathroom fans

Combining an LED bulb within the fan, these dual purpose bathroom vents offer that little bit extra.

Features

- + Slim, flush mounting modern look
- + Safety extra low voltage (SELV)
- + Built-in, energy saving 2 Watt LED bulb
- + Only 33 decibels

Wall mounted fan

Discreet bathroom fans

These fans have low-profile, minimalistic looks to harmonise unobtrusively with your bathroom.

Features

- + Slim, flush mounting modern look
- + Discreet look
- + Only 33 decibels

Ultra quiet bathroom fans

These low-energy fans feature ball-bearing motors to reduce noise in the bathroom. Their performance is as effective as standard fans.

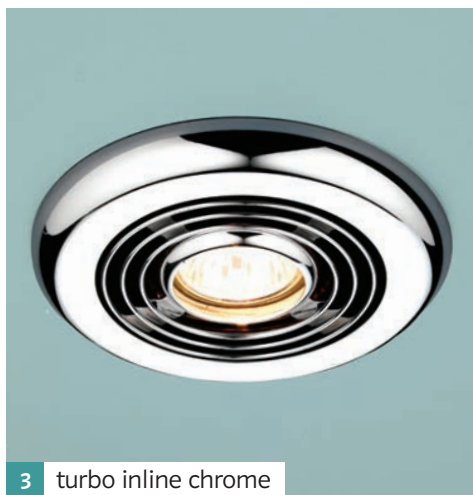

Features

- + Ultra quiet operation
- + Clean, fresh design
- + Option of a built in humidity sensor
- + Only 25 decibels, as quiet as a human whisper

⊕ 240V and 110 AC options

*All installations **must comply** to guidelines which are based on a zonal concept. The colour coded diagram below illustrates this concept and must be followed to ensure the safe installation of bathroom lighting. These regulations apply to domestic installations only.*

Zone 2 covers an area 0.6 metres wide immediately next to, and all round zone 1. Wash basins should also be treated as zone 2. The minimum rating here is IPX4.

Outside Zone has no special requirements, unless water jets are likely to be used for cleaning purposes.

- + Installations must be made in accordance with the current IEE wiring regulations and relevant building regulations
- + HiB recommends that all electrical bathroom products should only be fitted by a suitably qualified, Part P registered electrician

The IP (Ingress Protection) standard describes a uniform system for classifying the degrees of protection provided by the enclosures of electrical equipment.

First Numeral - Protection against ingress of foreign bodies e.g. tools, dust, fingers, etc.

Second Numeral - Protection against ingress of liquids

<p>0 No protection.</p>	<p>1 Protected against drops of condensed water. Drops of condensed water falling on the enclosure shall have no harmful effect.</p>	<p>2 Protection against drops of liquid. Drops of falling liquid shall have no harmful effect when the enclosure is tilted at an angle up to 15 degrees from the vertical.</p>	<p>3 Protection against rain. Water falling in rain at an angle equal or smaller than 60 degrees with respect to the vertical shall have no harmful effect.</p>	<p>4 Protection against splashing. Liquid splashed from any direction shall have no harmful effect.</p>	<p>5 Protection against water jets. Water projected by a nozzle from any direction under stated conditions shall have no harmful effect.</p>	<p>6 Protection against conditions on ship decks (deck equipment). Water from heavy seas shall not enter the enclosures under prescribed conditions.</p>	<p>7 Protection against immersion in water. It shall not be possible for water to enter the enclosure under stated conditions of pressure and time.</p>	<p>8 Protection against indefinite immersion in water under specified pressure. It shall not be possible for water to enter the enclosure.</p>

+ *Requires additional slotted waste

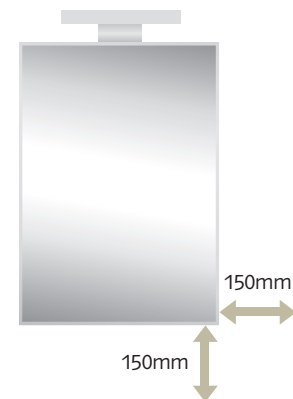

installation requirements

Mirrors and cabinets that are **electrically safe** for use in the bathroom, but non IP44 rated must be fitted in accordance with the diagram below:

Mirrors & cabinets with **sensors** installation requirements

These products must be installed with a minimum distance of **150mm** between the infra-red sensor switch and any adjacent wall or object to ensure correct operation of the sensor.

general care instructions

1. HiB recommends all mirror products are cleaned using a suitable soft cloth and water.
2. Do not use any abrasive cleaners on any HiB products.
3. Exceeding the maximum wattage shown, when replacing a bulb, could result in product damage.
