

QUALITY BATHROOM PRODUCTS

INSTALLATION PROCEDURES FOR IP44 WALL-MOUNTED MIRRORS

Before installing this product pay special attention to these instructions. It is recommended that this product is installed by a qualified electrician to IEE wiring regulations (BS 7671) and current building regulations. These products can safely be fitted into Zone 2. See Lighting Regulations Diagram.

1. Prior to commencing work isolate the power to the supply cable at the fuse box.
2. Choose the location in which you wish to install the mirror.
3. Check that there are no other concealed cables or pipe-work in the intended installation area (check the entire installation area)
4. The mirror is hung on the wall by means of two screw hooks which slot into the fixing plates on the rear of the mirror.
5. Accurately mark on the wall the position of the screw hooks.
6. Using the correct size drill bit for the wall fixing (please note that for certain wall types i.e. plasterboard walls, the wall fixings supplied are not recommended) drill holes in the marked locations. Place the Rawl plugs into the holes and screw the hooks into the wall ensuring that they are level.
7. Install the light fitting(s) onto the mirror. Make the electrical connection from the light fitting and house wiring into the IP44 box fitted on the back of the mirror. (we recommend that this operation is carried out by a qualified electrician to current IEE wiring regulations).
8. Mount the mirror onto the screw hooks to complete installation.

Cleaning

Please do not use any abrasives or solvents when cleaning this product. Only wipe over using a soft damp cloth. Do not allow any water to stand on any part of the mirror. Please clean up any spillages.

Lighting Regulations

All installations must comply to guidelines which are based on a zonal concept. The colour coded diagram below illustrates this concept and must be followed to ensure the safe installation of bathroom lighting. These regulations apply to domestic installations only. Installations must be made in accordance with the current IEE wiring regulations and relevant building regulations. HiB recommends that all electrical bathroom products should only be fitted by a suitably qualified, Part P registered electrician.
