Ideal Standard Live the Ideal

Live the Ideal

body & mind

At Ideal Standard, we believe that creativity is the catalyst to continuous evolution in your bathroom. As Europe's leading brand, Ideal Standard's goal is to create a living space that is truly like you. Sustainable and exclusively following three main philosophies: design, performance and innovation. Ideal Standard is the reflection of personalised well-being. Spirit and materials focused to create a universe where the body and mind are immersed in renewed pleasure day after day. Discover the new ground-breaking solutions that capture your desires.

Award-winning designers including Robin Levien RDI, Jasper Morrison, David Chipperfield and Seymour Powell have created designs that lend style and luxury to your home. Ideal Standard continues to invest in the most advanced technology to guarantee that each piece of porcelain, mixers, taps and shower fittings work perfectly and look beautiful. So for the complete bathroom, live the ideal with Ideal Standard.

3 Modern

A collection of seven contemporary bathroom suites and accessories by leading European designers including Robin Levien RDI, Jasper Morrison and David Chipperfield.

69 Create

A stunning bathroom collection by Robin Levien RDI, comprising three distinctive basin shapes which share a wide range of core pieces to create the bathroom of your dreams.

91 Space

Space products make use of every available inch to create better, extra and new bathrooms. The Space concept is not just about innovative products – it's about inspiring you to look afresh at the space you have.

117 Bathing and wellness

Many Ideal Standard suites include a bath option, but also available is a collection of luxury baths in all shapes and styles to meet your needs. Our powerful whirlpool and shower systems complete your bathroom experience.

133 Classic

Four classic bathroom ranges combining period detail with technical expertise. Our range of classic baths would add style and opulence to any bathroom.

157 Mixers and taps

A comprehensive collection of 17 different mixer and tap ranges by top international designers. Attention to detail married with technological innovation ensure this collection adds the perfect finishing touch to any bathroom.

Jasper Morrison 1000mm wall hung vessel basin unit with 50cm vessel basin, close coupled wc suite and 180 x 85cm Idealform bath, right handed; see p10 for the complete Jasper Morrison furniture range and p116-123 for more bath options

Jasper Morrison mixer fittings used throughout; see p160 for the complete range

Modern

For over a century Ideal Standard has brought the simplicity and innovation of contemporary design into millions of homes.

Good design is about both form and function. Ideal Standard leads the way through technological innovation and has realised the visions of leading European designers, each of whom refresh the bathroom in their own way.

Jasper Morrison

Ideal Standard has teamed up with Jasper Morrison, one of Europe's most successful designers, to create a bathroom range which fully realises our design ethos. His contemporary forms are a subtle combination of soft squares and oval interiors which have been developed across a full range of white sanitaryware, furniture and fittings to produce a modern classic.

Design by

Jasper Morrison is one of today's most influential industrial designers. Born in London, he is renowned for his aesthetically elegant, quietly humorous style and has designed everything from a tray-table to a tram system. In the early 2000's Morrison set up a new studio in Paris and proceeded to divide his working life between there and London.

Jasper Morrison 50cm semi-pedestal basin and wall hung wc suite; see p6 for the complete Jasper Morrison bathroom range

Jasper Morrison mixer fittings used throughout; see p160 for the complete range

Jasper Morrison

White

Designed by architect David Chipperfield and inspired by the relationship of geometric forms, the sculptural simplicity of White brings the best of contemporary design to the bathroom. White has a selection of twelve pieces from which you can create your perfect bathroom.

White 50cm cube pedestal basin, close coupled wc suite and 170 x 80cm Idealcast bath; see p18 for the complete White range and p116-123 for more bath options

Silver mixer fittings used throughout; see p162 for the complete range

Design by

David Chipperfield has established himself as one of the world's most accomplished architects. His buildings are characterised by their careful, almost sculptural simplicity. The extent of his designs range in style from furniture commissions to urban planning projects. Many of these projects have been widely published and exhibited.

Kyomi

Designed by Robin Levien, Royal Designer for Industry. Kyomi has the appearance of being naturally formed by centuries of running water. The hollows and curving lines of the basins, bowls and baths fashion the Kyomi collection.

Design by

Robin Levien RDI is one of Britain's most consistently successful product designers of the last 25 years. In 1999 Robin set up Studio Levien with his wife Tricia Stainton to design domestic products for leading companies all over the world. He was made non executive Design Director of Ideal Standard in the UK in 2003.

Purity

Purity, designed by Wolfgang Müller-Deisig, is simple yet ingenious, incorporating the innovative concept of combining two basins in one. Beautiful to look at as well as very practical, the washbasin helps to conserve precious water by giving you the choice between a little dabble and a luxurious splash.

Design by

Wolfgang Müller-Deisig Born in Berlin, Germany in 1946. He founded Deisig Design studio in 1971, which was primarily engaged in the development of office chairs, office furniture and bathroom products such as ceramics and fittings. Müller-Deisig gained International reputation for his work of ergonomic office chair concepts. During his professional career he has earned numerous design awards in Europe, USA and Asia.

Washpoint

Washpoint, is one of our most versatile ranges because it offers you a wide choice of both single and double washbasin configurations, plus two ranges of furniture, Start and Trend. The endless combinations of porcelain married with the Ceraplan mixer fittings, also designed by Marc Sadler, provide a versatile collection that can be adapted to any bathroom.

Design by

Marc Sadler, is an accomplished designer with more than four decades of experience working for leading companies in a variety of sectors. Today Sadler designs furniture and furnishings, including electrical and domestic appliances, lighting and technical products. He also teaches in several design schools and universities across Europe.

Alto

The Alto collection, designed by the internationally renowned Studio Levien, has many innovative features that you'd expect from a luxury bathroom range – yet at an affordable price.

This versatile range of contemporary porcelain and stylish bathroom fittings is suited to domestic or commercial use, whatever the space. Its relatively small scale makes it ideal for small bathrooms, en-suites and cloakrooms.

No wonder Alto is the choice of so many designers and architects.

Countertops

Countertop and under-countertop basins offer extra scope in bathrooms where space is a problem or where installation is awkward. Set into vanity units, they allow for storage beneath, with the additional advantage of hiding any unsightly plumbing. Particularly suitable for cloakrooms and bedrooms, countertop basins are very versatile and lend themselves to individual variations on the traditional basin theme.

Create

Create is a stunning bathroom collection comprising three distinctive basin shapes which share a wide range of core pieces including pedestals, closets and baths. Create is an affordable new concept, designed by Robin Levien Royal Designer for Industry, which offers you the unique opportunity to design your bathroom to suit your own personal needs.

- 70:71 **Core components**
- 72:73 **Creativity**
- 74:75 **Create furniture**
- 76:77 **Edge**
- 80:81 **Drift**
- 84:85 **Square**
- 88:89 **Technical**

The core components

Create is about giving you the tools to plan your dream bathroom – we provide the framework, you provide the inspiration. Our core pieces are a range of wcs, pedestals, baths and furniture which work with all three of our basin designs. You simply decide which style you like and then choose the core pieces you need. It's that easy.

Basins

The Create range of basin pedestals is uniquely versatile, so however you plan your bathroom, you'll find one to suit your configuration. If you want a more spacious feel to a small bathroom, the wall-mounted semi-pedestal leaves the floor beneath the basin visible, creating the illusion of space. The classic full pedestal stands as a separate element. And the duct pedestal fits on to the Pendock ducting system. Both the semi-pedestal and duct pedestal are available in two sizes to fit a washbasin or handrinse basin.

- 1 Full pedestal available for 60, 56, 55 and 50cm basins
- 2 Semi-pedestal available for 60, 56, 55 and 50cm basins
- 3 Small semi-pedestal available for 40 and 45cm basins
- 4 Duct pedestal available for 60, 56, 55 and 50cm basins
- 5 Small duct pedestal available for 40 and 45cm basins

WCs and bidets

Once you have chosen your basin design – Edge, Drift or Square – you can decide which type of wc will best suit your bathroom: close coupled, back-to-wall or wall mounted. If you choose Edge or Square, the wc seat and cistern will have contemporary geometric lines, whereas Drift styling is rounder and more organic. Both the back-to-wall and wall mounted wcs have concealed cisterns and the back-to-wall wc can be used with the wc unit from the Create furniture range. The close coupled wc can be used with Pendock ducting.

- 6 Close coupled wc suite available with Edge/Square seat and cover or Drift seat and cover
- 7 Back-to-wall wc suite available with Edge/Square seat and cover or Drift seat and cover
- 8 Wall mounted wc suite available with Edge/Square seat and cover or Drift seat and cover
- 9 Floor standing bidet one tap hole

Baths

Defined by geometric lines and sinuous curves, each one of our Create baths is a perfect combination of form and function. To give you all the options you need, there are four different bath types: rectangular baths in two widths, a shower bath and an offset corner bath. All have generous capacities and their wider-than-usual outside rims allow you to install your bath taps in more than one position (excluding 170 x 70cm).

Selected Create baths are available with Ideal Standard's innovative Twin Plus Whirlpool System. For further details call 0800 590311 for a Whirlpools Collection Brochure.

The Create shower bath is produced in Idealcast – a composite of resins and minerals, which is cast onto the reverse of a vacuum formed acrylic shell. This creates a very rigid product comparable with the solid feel most people associate with cast iron. The shower bath and offset corner bath come in a left or right handed version. Bath screens and over-bath enclosures are available for all four baths.

- 10 70 bath 170 x 70cm Idealform bath, with optional matching Unilux bath panels and screen
- 11 75 bath 170 x 75cm Idealform bath, with optional matching Unilux bath panels and screen, available with Twin Plus Whirlpool System
- 12 Shower bath 170cm Idealcast shower bath with optional matching bath panels and screen
- 13 Corner bath 160cm Idealform or Idealform Plus+ offset corner bath, with matching bath panel and screen, right handed and left handed versions, available with Twin Plus Whirlpool System

Thinking creatively

Create So many bathrooms look great in the brochure but recreating that look in real homes is another matter. Create rethinks every component to make your bathroom easier to plan and install. Thinking creatively is at the heart of this collection so whether it's hiding ugly plumbing or perfecting over-bath showering you can rest assured we've given it lots of thought...

Essential storage

Whether you're part of a busy family or a working couple, all households need as much storage space as they can get. In this respect the 600mm and 750mm Create vanity chests are a real bonus. The top drawer has a handy U-shaped compartment for organising accessories and toiletries, and the two deep drawers beneath are large enough to store towels as well as other all-important bathroom kit. And with smooth-action, full-extension runners, you can pull each drawer right out to access your stored items.

performance

Keeping clutter to a minimum

As far as bathroom clutter is concerned, 'less is more' is definitely the best approach. Create bathroom furniture really helps to keep things tidy by providing a generous amount of cupboard space to stash away all your bits and pieces. The mirror cabinet has a double-sided mirror and adjustable shelving.

Made to measure

To give your bathroom a flawless finish we've taken care of every last detail. So where ducting needs to be capped off – on one side of a wc, for example – a tidy solution is provided with the Pendock ducting system.

innovation

Making connections

Pipe ducting makes unsightly plumbing a thing of the past. It can be costly and inconvenient to set pipework into the bathroom wall, but ugly and impractical to leave it exposed. With the Pendock ducting system, pipes are hidden within a smart curved shell which connects seamlessly with items in the Create range. These are specially designed to sit neatly on top of it, resulting in a stylish unified appearance. Ducting is easy to install, which means you can get the contemporary look you've always wanted without the expense of building work. It is available in oak and walnut laminates to match the Create bathroom furniture or you can paint it any colour you choose.

design

A neat link-up

Another piece of the jigsaw, the new Create duct pedestal conceals water supply and waste pipes like a conventional pedestal, but in this case sits on top of the ducting rather than standing on the floor. It comes in two sizes, one for washbasins and one for handrinse basins. Like the ducting, it can be painted any colour to match your bathroom decor.

Over-bath showering

When you need a bath and a shower but don't have space for both an over-bath shower is the obvious solution. The Create range of baths are shaped for comfortable bathing. And all (except the 170 x 70cm) have extra space at the 'foot' end to allow plenty of room for showering. To give you the flexibility you want, all Create baths are available with their own bath screen. Smart and minimal, all screens fold back for bathing and cleaning. If you prefer the feel of a shower cubicle we have developed the Create 'bath enclosure'. This practical over-bath shower system is made up of two hinged screens which fasten together with magnetic seals. Both screens fold out of the way so you can still enjoy a comfortable bath whenever you want one. There are over-bath enclosures to fit each Create bath.

Create furniture

Practical and built to last, our furniture has a semi-fitted look which combines minimalist chic with the classic style of individual units. It comes in an oak or walnut finish and is complemented by a choice of worktops in oak and walnut laminate, or a sophisticated solid-surface option. The furniture comes fully assembled for easy installation.

Space planning

The Space concept is not just about innovative products – it's about inspiring you to look afresh at the space you have. Space aims to get you thinking about how you can reconfigure, convert or extend to create more versatile bathrooms. Throughout this section we've used plans to illustrate how Space products have been designed to make use of every available inch to create better, extra and new bathrooms.

Space 55cm short-projection pedestal basin, close coupled wc suite and 150cm shower bath (right handed) with bath screen; see p90-97 for the complete Space range

For more bath options see p106-107 and p116-123

Waterways CD basin mixer with Tipó handles and bath filler; see p174 for the complete range

Space

Today, living space is the ultimate luxury. And it's often in the bathroom that space becomes a real issue. But with the Space range from Ideal Standard you can plan better bathrooms to help your home run smoothly.

Designed by Robin Levien RDI, Space is a collection of innovative and award-winning designs. Now you can make more of your home by utilising spaces you didn't even know you had. Whether you want to adapt your family bathroom to help ease the morning gridlock, create a downstairs cloakroom or add an en-suite to your master bedroom, our state-of-the-art Space products will help you achieve it.

Space to breathe

The family bathroom is typically squeezed into the size of a king-size bed! This means there isn't much room to turn around, never mind store anything. But Space products can transform an ordinary bathroom into something special – including somewhere to store all those bits and bobs. Space will help you to streamline your life as well as your bathroom.

Family bathroom

The plan below shows how the Space range can revive a small bathroom so that it becomes stylish and easy to use, and includes that vital extra storage. Originally there was no storage in this small bathroom. The bath, basin and wc were squeezed in without a thought and supply pipes were glaringly visible.

In the new design (left) the old configuration is kept but the Space products fit the space better and ugly plumbing is hidden inside the units. Space bathroom furniture provides additional storage and runs the full length of the right hand wall, maximising shelf area. The 150cm shower bath doubles up as a full-size shower. The semi-countertop basin is designed to fit into the compact 21cm projection of the furniture. The wc seat is fitted at an angle of 45 degrees so its closeness to the wall presents no problems.

Old bathroom

Space 55cm semi-countertop short-projection basin, back-to-wall wc suite and 150cm shower bath (left handed) with bath screen; see p100-107 for the complete Space range

For more bath options see p106-107 and p116-123

Space furniture in shaker white 45cm wc unit; 60cm basin unit; 75cm bath unit; 45cm wall unit; granite countertop; white plinth; see p108 for the complete Space furniture range

Ceramix basin mixer and bath filler; see p182 for the complete range

Space of your own

The Space range makes it easy to add the private luxury of an en-suite facility in many existing bedrooms. You don't need a bedroom the size of Caesar's Palace, just a little spare space and the right products. Even the corner of your bedroom can become a comfortable shower room. Now you can avoid the morning rush hour in the main bathroom. And in the evening it's just a short step from bathroom to bed.

En-suite

Space corner products let you fit a stylish en-suite shower room into a space no bigger than a corner bath.

There is room for a Space shower room in the majority of master bedrooms.

The Space corner basin, wc and Joy quadrant shower enclosure and tray (right) form three sides of a triangle for a chic, practical shower room. The dimensions also allow for fitted wardrobes to be built in on either side, so your bedroom becomes truly elegant and functional.

Bedroom layout

Space to grow

When it feels as if the house is about to burst at the seams, you can always think about utilising loft space. Maybe your teenager is longing for a private lair or you'd like to be able to put guests up in comfort. Whatever your requirements, it's an ideal opportunity to add an extra bathroom to ease the pressure in other parts of the house – so you can extend your options as well as your living area.

Loft conversion

A loft conversion puts the last – and highest – space in the house to good use, and the Space range turns it into the height of luxury.

Headroom may be limited, but a small room under a sloping roof (left) can accommodate a shower bath and bath screen, a wall mounted wc and a short-projection basin without difficulty. The wc is positioned underneath the skylight to maximise headroom and the cistern and waste pipes are cleverly hidden for a clean modern look. This loft conversion contains a double bedroom with an en-suite bathroom.

Hidden space

Most families would benefit from a downstairs cloakroom for visitors or dealing with kids. But sacrificing living space is usually unthinkable and an extension may not be an option. By using Space products, though, it's possible to fit a small, practical cloakroom under the stairs. Now you can open up tucked-away parts of the house that only used to be good for games of hide-and-seek.

Cloakroom

It may once have been the broom cupboard, but in the space beneath the stairs there is an opportunity to gain a ground-floor cloakroom.

The elevation (below) shows how the Space wall mounted wc can be installed to create a clean and tidy cloakroom where the cistern is hidden behind a wall.

It's a tight fit, but the micro basin (right) occupies a minimum of space and the double doors of the cloakroom open outwards for easy access and cleaning.

Space solutions

Space has been designed with your needs in mind. It gives you all the options to plan better bathrooms and add the extra facilities you need. With a Space micro basin and close coupled wc, for example, you can install a fully functional cloakroom almost anywhere. Our versatile corner and short-projection products help you make use of every available nook and cranny. And, whilst in an ideal world it makes sense to have a separate shower as well as a bath, if you don't have room, the Space offset corner shower bath provides the next best thing.

Plan measurements are shown in millimetres. Dimensions on plan drawings are given for guidance only and are not to a specific scale.

Space Close coupled wc

Room to manoeuvre

In the small family bathroom below, the close coupled wc proves a real space saver. The shorter projection of the wc leaves a larger area in the middle of the room to turn around and use all the facilities with ease. The seat is angled at 45 degrees so that the wc can be positioned closer to the wall and you will avoid burning your leg on the towel warmer.

Space 58cm short-projection basin, close coupled wc suite and 170cm shower bath (right handed) with bath screen

Space Back-to-wall wc

Fully fitted with extra shelf space

The back-to-wall wc can be installed against a wall or ducting. It can also be fitted to a slim wc unit from the Space bathroom furniture range which contains the cistern and introduces useful shelf space above it. To allow closer proximity to the wall with a 45cm wc unit, the seat is angled at 45 degrees.

Space 55cm semi-countertop short-projection basin, back-to-wall wc suite and 150cm shower bath (left handed) with bath screen

Space furniture 45cm wc unit; 60cm basin unit; 75cm bath unit

Space Corner wc

Making sense of corners

When you're using Space products, it's easy to find enough room for an en-suite shower by sectioning off one side of a bedroom. In this plan the corner wc fits in tidily beside a micro basin to allow enough space for a full-size shower with a bi-fold shower door. The seat is angled to allow for legroom.

Space 40cm micro basin and corner close coupled wc suite

Simplicity 80cm shower tray

Joy infold shower enclosure
Call 0800 590311 for an Ideal Standard Showers Studio Collection brochure

Space Wall mounted wc

Creating the illusion of space

Installing a wall mounted wc in a small bathroom will create the illusion of space by leaving more of the floor and wall visible. It's also easy to keep clean, making it ideal for wet rooms as well as small bathrooms. Like the back-to-wall wc, the cistern is concealed behind a wall or inside a fitted unit. In the plan below, a wall mounted wc and a corner basin form part of an en-suite wet room where the cistern is hidden in a wardrobe.

Space 56cm corner basin and wall mounted wc suite

Space Short-projection basin

A full-size basin for tight spaces

The short-projection basin allows for a full-size basin in even the smallest of spaces. In the shower room below, it leaves enough room to access all the facilities easily. The basin is teamed with a Waterways swivel spout basin mixer so you can push the spout to one side if you want to wash your hair.

Space 58cm short-projection basin and close coupled wc suite
Calista alcove 80cm shower tray and enclosure
Call 0800 614191 for an Ideal Standard Showers International Collection brochure

Space Offset corner basin

Fitting up against the wall

A neat solution to tricky corners, the offset corner basin fits in snugly against the wall so there's no awkward gap that's hard to clean. In the small family bathroom below, you can see how it makes the most of the space by not leaving a 'dead' area in the corner of the room. The basin is available in a left or right handed version and a pedestal or semi-pedestal option.

Space 56cm offset corner basin (right handed), close coupled wc suite and 150cm shower bath (right handed) with bath screen

Space Corner basin

Using precious corners

The corner basin is another practical option for making use of awkward angles. In this triangular en-suite shower room it is combined with other corner products to create a convenient, compact facility. No space is wasted which means the shower room will fit neatly into the corner of a bedroom.

Space 56cm corner basin, corner close coupled wc suite and corner shower tray
Joy in-fold shower enclosure
Call 0800 590311 for an Ideal Standard Showers Studio Collection brochure

Space **Narrow basin**

Making elbow room

In many small bathrooms, such as the one below, the basin often overlaps the bath and is too close to the wc because standard-sized products just take up too much room. With a narrow basin you can avoid these problems. The basin is slimmer but longer than a standard one, so it provides the same volume as a full-size basin but occupies less wall space.

Space 44cm narrow basin and close coupled wc suite
Studio 170cm Idealform spacemaker bath (left handed)

Space **Semi-countertop short-projection basin**

Designed for the slimmest fitted units

This generous washbasin is designed to fit into the slim 21cm Space bathroom furniture range. In this plan it forms part of a fitted bathroom which provides shelf space and built-in storage. The basin is available with one tap hole in a left or right handed position, or two tap holes.

Space 55cm semi-countertop short-projection basin and back-to-wall wc suite
Studio 170cm Idealform shower bath (right handed) with bath screen
Space furniture 45cm wc unit; 60cm basin unit; 75cm bath unit

Space **Micro basin**

A small but perfectly formed handrinse

When you need to squeeze a cloakroom into the smallest of spaces the micro basin is a great solution. Combined with a Space wc the short projection of the micro basin allows you to create an extra facility that is so compact it can even be tucked away under the stairs. The basin has two tap holes and is available with or without its shroud.

Space 40cm micro basin and close coupled wc suite

Space **Shower bath**

A solution for all the family

The shower bath combines a roomy showering area with a full-size bath to give you the best of both worlds. The bath screen folds inwards as well as outwards which makes it easier to use the bath when the shower is not in use. So children's bathtime need not be a struggle and a long soak is all the more relaxing. The bath is available in a left or right handed version and in two sizes: 170cm or 150cm.

Space 58cm short-projection basin, close coupled wc suite and 170cm shower bath (right handed) with bath screen

Space 120 bath

When a bath is a necessity

If your bathroom is too small for a full-size bath but you need a bathing facility – perhaps for small children – a 120cm bath is a good option. Small but perfectly formed, it can be combined with a shower screen to create a fully functional bathroom.

Space 58cm short-projection basin, close coupled wc suite and 120cm Idealform bath with bath screen

Studio Spacemaker bath

Making the space you need

The cleverly curved spacemaker bath has the width of a standard bath at the 'head' end – allowing plenty of space for bathing – but is tapered towards the 'foot' end to leave room for a basin, wc or towel warmer beside it. The plan below shows how the bath curves away from the basin so that the basin doesn't overhang the bath and is easier to clean around. The spacemaker bath is available in a left or right handed version.

Space 44cm narrow basin and close coupled wc suite
Studio 170cm Idealform spacemaker bath (right handed)

Studio Shower bath

A shower bath for smaller spaces

The Studio shower bath widens out at the 'foot' end and beneath the shower, so it's great for bathing and showering in comfort. Its shower screen features Ideal Standard's innovative deflector seal which directs water into the bath and prevents it from splashing out. The screen opens inwards and outwards for easy access and cleaning.

Space 58cm short-projection basin and corner close coupled wc suite
Studio 170cm Idealform shower bath (right handed) with bath screen

Space Shower tray

Working all the angles

When space is at an absolute minimum and a shower facility seems out of the question, this compact corner shower with in-fold doors can be the perfect solution. In the plan below, the shower fits neatly into a corner and its triangular shape creates just enough room to manoeuvre.

Space 58cm short-projection basin, close coupled wc suite and pentagon shower tray
Joy in-fold shower enclosure
Call 0800 590311 for an Ideal Standard Showers Studio Collection brochure

Space that works

Furniture

While Space units are designed so that they can be installed in a continuous run, they may, if preferred, be fitted as separate items of furniture, for example as a vanity or wc unit. Some unit combinations are shown right

- 1 45cm wall unit above 45cm wc unit
- 2 60cm wall unit above 60cm wc unit
- 3 Two 45cm wall units above 60cm wc unit and 30cm base unit
Doors can be hung to open left or right
- 4 60cm right handed basin unit, 75cm bath unit and bath panels
The basin unit is available with centre-opening doors for use where access is not restricted. For other installations – such as where there is an overlapping bath panel – left and right handed options are available.
- 5 60cm basin unit
- 6 60cm basin unit with 30cm base unit
- 7 60cm basin unit and two 30cm base units, wall mounted with no plinth

Each unit can be fitted clear of the floor, without a plinth, if a plinth is not needed to conceal plumbing. Installation is straightforward because the units are supplied fully assembled.

Space Bathroom furniture

With a unique projection of 21cm, Space bathroom units can be fitted in almost any bathroom, opening up small spaces to a whole new world of high-quality design. Whether you are planning a new bathroom or modernising an existing one, Space furniture can make a real difference: storage problems are solved and unsightly plumbing is completely concealed. The end result is clean, modern and stylish.

Space 55cm semi-countertop basin, back-to-wall wc suite

Space Furniture 60cm basin unit and 30cm base unit; 60cm wall unit above 60cm wc unit unit in oak

Ceramix basin mixer; see p182 for the complete range

Thinking about space

Space bathroom furniture Designed to help you plan a better bathroom with the extra facilities you need. Innovative and versatile, Space bathroom furniture can help you make use of every nook and cranny and with all that vital extra storage that every busy household needs, creates a bathroom that feels spacious and stylish.

Bath panels

Bath panels complete the fitted look. Matching front and end panels are available in each of our six finishes: maple, gloss white, shaker maple, shaker white, oak (shown below) and walnut.

Dual flush

Because you don't always need a full flush, Ideal Standard has developed dual flush cisterns (below). The flush plate has two buttons and sits neatly on the countertop. The small button delivers four litres, the large button delivers six litres. Four out of five times the short flush will be used saving up to nine litres of water per flush.

Clever storage

Glass-shelved wall units afford generous storage for toiletries and medicines. Doors need to have clearance for opening. Do not position wall units above the semi-countertop basin as there will be insufficient headroom.

design

Made to measure

Scribing pieces are also available to match the four door finishes. These enable the furniture to be fitted wall-to-wall, neatly filling the available space.

A unique basin

The 55cm short-projection semi-countertop basin sits uniquely into this slender cabinet depth of 210mm but still provides a generous family basin.

An award-winning design

The Space wc has a seat that can be fitted in three positions – facing forwards, or turned 45 degrees to left or right. The angled seat allows the wc to be sited closer to a wall without making it too much of a squeeze. This simple, intelligent design was placed fifth in the BBC Essential Top Fifty product awards and the entire Space range was chosen as a Design Council Millennium product.

innovation

No more unsightly plumbing

Beneath the base units there is a duct space to contain all plumbing. For aesthetic reasons the doors extend below the floors of the units. This ingenious solution gives proportions that look right while allowing sufficient height to accommodate a run of gradually falling soil pipe. Inside, the basin unit has a false back to cover the plumbing supplies and waste pipe.

performance

Planning your space

Space bathroom furniture A choice of finishes, handles, units and countertops allows you to custom-make the perfect bathroom to suit your needs, taste and bathroom space.

Doors and panels

For doors and front panels, there is a choice of maple, gloss white, shaker maple, shaker white, oak or walnut finishes. The cabinet frames are available in white or maple.

Countertops

Countertops come in granite, mahogany, maple, walnut, gloss white and matt white finishes. Countertops are available in the following lengths: 180cm, 120cm and 60cm (projecting 21cm from the wall). They can be cut to the required length on site.

Handles

Bathing and wellness

What could be more relaxing than sinking into a deep, steamy bath at the end of the day? Many Ideal Standard suites include a bath option, but also available is a collection of individual sizes, shapes and styles to meet your needs.

All baths are designed and made to the highest standards with our 25 year guarantee for total peace of mind. Our powerful whirlpool and shower systems complete the collection, adding an element of luxury and invigoration to your bathroom experience.

Bathing

All baths are designed and made to the highest standards with our 25 year guarantee for total peace of mind. There are baths in: Idealcast, a material as strong as iron but a fraction of the weight; Idealform, a high quality acrylic sheet which is warm to the touch; and Idealform plus+, which has the added benefit of exceptional strength and rigidity.

Idealcast baths

The strength of cast iron with half the weight – Idealcast is a composite of resins and minerals, which is cast onto the reverse of a vacuum formed acrylic shell. This creates a very rigid product, comparable with the solid feel most people associate with cast iron, surpassing British Standard requirements for baths.

Relax and unwind

Idealform baths All baths are designed and made to the highest standards. Idealform baths are moulded from a high quality acrylic sheet which is warm to the touch and provides exceptional insulation ensuring the water retains its heat for a longer more relaxing bath.

Idealform plus+ baths All the benefits of Idealform and more, taking bathing to a new level of luxury. Multiple layers combine to create exceptional strength and rigidity. Luxuriously glossy and smooth to the touch, the stain-resistant surface is also wonderfully easy to clean and resistant to wear and tear. Thanks to a solid core, your Idealform Plus+ bath is resistant to creaking and movement.

Each bath comes with our 25 year guarantee.

SHOWERS

A shower should be an invigorating experience combining the perfect flow of water and temperature. Our showers combine eye-catching design, precision engineering and innovation to ensure the perfect shower experience over and over again.

Wet rooms Serenis echos the simple pleasure and sensuality of showering with its stunning enclosures.

Frameless Modern and minimalist, frameless enclosures add a touch of luxury and class to the bathroom.

Framed High quality robust enclosures – Joy and Connect framed showers combine style and practicality.

Serenis

A range of beautifully constructed and stunning shower enclosures (far right), Serenis combines glass and metal into a sculptural form. Matched with a water delivery system that is truly innovative, Serenis redefines the look, quality and experience of a shower. For details on these and other shower enclosures call 0800 590311 for an Ideal Standard Showers International Collection brochure.

Bliss

Light, elegant and spacious, the Bliss range of enclosures combines styling with careful thought through functionality. The curved glass doors of the Bliss Quadrant (right) give a strikingly contemporary appearance that will enhance the look of any bathroom.

Water delivery system

The Serenis water delivery system uses Ideal Standard's innovative 'in-line valve' technology. Water is piped through the central column of the enclosure and then delivered through the fixed overhead shower spray or through the hand spray. You choose.

innovation

Redefining showers

Our shower enclosures and trays are available in a wide range of styles and sizes to complement any bathroom layout. New ideas and thoughtful features run right across the range and all our enclosures meet or exceed European standards. For details on these and other framed shower enclosures call 0800 590311 for an Ideal Standard Showers Studio Collection brochure

Joy

Available in a wide range of sizes, all in silver finish, Joy's clean styling will complement any bathroom. The uncompromising engineering is reflected in the ten year guarantee for the enclosure.

Connect

Connect (main image) is a range of beautifully constructed shower enclosures that redefine the look, quality and experience of a shower.

Simplicity shower trays

Simplicity is an elegant range of shower trays. Pure, minimal shapes are available in a wide range of sizes and options designed to make installation simplicity itself. For more information on Simplicity trays please call 0800 590311 for an Ideal Standard Showers International Collection brochure.

Idealite

Simplicity shower trays are sculpted from Idealite, an innovative new material developed by Ideal Standard. Idealite creates a shower tray which is both remarkably light and surprisingly strong.

innovation

Complete shower experience

Ideal Standard's Trevi offers a five year guarantee on an extensive range of shower valves, shower kits and accessories and with Trevi technology you get total reliability and quality for a great shower, every time. So choose from their extensive range of shower valves, shower kits and accessories, and then just add water. For more information on Trevi Showers please call 0800 614191 for a Trevi Showers brochure.

Trevi Moonshadow

Designed by Robin Levien RDI, Moonshadow is a collection of six carefully considered and beautifully crafted showers with uniquely shaped shower heads, long brass slide rail bars, chrome fittings, integrated soap dishes and concealed fixings.

Trevi TT

The beautifully clean and contemporary lines of the TT Shower Collection mirror the meticulous technology at the heart of their design. The temperature handle delivers precise thermostatic control, for total safety.

innovation

Trevi Logical

Wireless Digital Thermostatic Shower

The Trevi Logical gives you instant remote control over your shower from up to ten metres away. Its features include: automatic shutdown after 15 minutes if the shower is left running; the perfect temperature shower, every single time, with no more cold surprises; consistent temperature maintained by use of a thermostatic element, even if a toilet is flushed during showering. Ideal for children and people on the move. Trevi Logical gives you safe control at the touch of a button. It's digital, it's practical, it's Trevi logical.

Plaza

Designed by Dave Tilbury of Studio Levien, Plaza is influenced by the new modernism of the 1930s with its semi-octagonal lines and mouldings. Flexible enough to be used in traditional or modern settings.

Design by

Dave Tilbury is a senior designer at Studio Levien and has worked very closely with Robin Levien for the past 23 years. He studied Production Engineering followed by Ceramics at Bristol Polytechnic, graduating in 1985. His exceptional design, modelling and computer skills have contributed greatly to the success of many Ideal Standard products.

Plaza close coupled wc suite, floor standing bidet

Plaza fittings used throughout; see p194 for the complete range

Charlotte

The Charlotte collection effortlessly evokes the wealth and opulence characterised by the Victorian period. If the rich contrasts, generous curves and bold motifs belong to another century, the materials and techniques which create them are thoroughly contemporary. It's this level of craftsmanship, combined with a delicate touch and delight in decoration, that makes for timeless quality.

Charlotte 63cm pedestal basin, high level wc suite, bidet; see p142 for the complete Charlotte range

Mixers and taps

Mixer and tap fittings are an important element in bathroom design. This collection gives you a wide choice in fittings, ranging from contemporary to traditional Victorian styles and a comprehensive choice of finishes. Ideal Standard has used top designers from all over the world to design each collection with individuality and creativity. This attention to design married with technological innovation ensures that Ideal Standard taps and mixers add the finishing touch to any bathroom.

Technological innovation

Mixers and Taps Ideal Standard leads the way through technological innovation to ensure fittings are easy to install and maintain, even in hard water or low pressure areas. Many of the great engineering advances in tap manufacture were originated by Ideal Standard. These include ceramic disc technology, which controls water flow and temperature with impeccable precision, single lever operations which offer smooth, temperature-controlled water, dual controls for mixer bodies, and quarter turn operations for taps.

innovation

1 CLICK technology

The single lever basin mixer and bidet mixer incorporate a CLICK feature that encourages water saving – the user lifts the handle until they feel a slight resistance. This resistance informs the user that the fitting is delivering only 50% of its maximum flow potential. Lifting the handle further enables the fitting to deliver maximum flow. CLICK technology is available on Idyll Two, Ceramix, Ceraplan and Melange.

3 Ceramic Disc technology

The multi-port cartridge brings a unique feature for easy temperature control. A single lever controls the pressure and temperature within a unique comfort zone, between 30-45°C. This gives more sensitive control and provides smooth effortless handle operation even at high pressures. See fig. 1-4 above right.

innovation

Fig. 1 Full arc of lever

Fig. 2 Comfort zone

Fig. 3 Hot

Fig. 4 Cold

Thermostatic control

The Cool Body innovation ensures the fitting remains safe to touch, whilst Thermostatic control ensures that water temperature is maintained for total comfort and safety. This means you and your children are safe regardless of any changes in water usage elsewhere in the home. Available on Melange and Active.

2 Temperature limit stop

The Temperature Limit Stop can be pre-set in any of four positions to provide extra safety. The safety stop feature on all single lever models limits the mixer delivering water in a fully opened hot position.

design

Idealfill

A new concept in bath filling, Idealfill fittings may be mounted on or around the bath or on the wall, independently of the filler, without the need for a conventional spout. The water comes from the combined filler and overflow. This enables you to turn the water on and off from a convenient place without having to stretch around a shower screen or alcove. Idealfill is a low pressure product and will work with the majority of domestic systems delivering 23 litres of water per minute – faster than any other bath filling system. Currently available in Cone or Silver.

4 Brass fittings

Cast brass body fully compliant with European standards.

5 Easy maintenance

Removable outlet nozzle for easy maintenance or upgrade.

6 Topfix installation

The Academy, Idyll Two, Ceramix, Ceraplan SL, Disc & Duo and Active mixer ranges incorporate this new system which has an innovative patented feature, enabling the mixer to be fitted from above the basin. This avoids the difficulty of tightening the fitting in the awkward space beneath the basin, simplifying and speeding up the installation time. The matching bidet mixer is also available with the easy fit system.

performance

Jasper Morrison

Designed by Jasper Morrison, the philosophy behind this collection is to consider every detail of your bathroom – including how you use water. The range of mixers feature an oval spout with a specially designed aerator to deliver a water flow that is reminiscent of a natural waterfall. Simple, clever design that improves your daily experience.

Jasper Morrison single lever basin mixer with pop-up waste

Jasper Morrison 50cm semi-pedestal handrinse basin; see p6 for the complete Jasper Morrison bathroom range

Design by
Jasper Morrison is one of today's most influential industrial designers. Born in London, he is renowned for his aesthetically elegant, quietly humorous style and has designed everything from a tray-table to a tram system. In the early 2000's Morrison set up a new studio in Paris and proceeded to divide his working life between there and London.

Silver

Designed by David Chipperfield, Silver is a unique collection of stunning chromium plated mixer taps for baths, basins and kitchens (see separate brochure; see back cover for details). The fittings have been designed to complement the White range but are equally suitable for use with other ranges. Silver has a choice of single lever or dual control mixer taps. All mixers incorporate Ideal Standard's unique ceramic disc technology.

- 1 Basin mixer

Design by

David Chipperfield has established himself as one of the world's most accomplished architects. His buildings are characterised by their careful, almost sculptural simplicity. The extent of his designs range in style from furniture commissions to urban planning projects. Many of these projects have been widely published and exhibited.

Academy

Designed by Seymour Powell, Academy is inspired by powerful architectural forms. The distinctive cone handle is integrated into the whole, making the spout the visual focus. The design of Academy is an exercise in controlling both surface and line to create geometrically constructed forms with natural flowing lines.

Design by

Seymour Powell Richard Seymour and Dick Powell formed Seymour Powell in 1984. Seymour Powell is the company behind break-through design concepts such as the cordless kettle and ENV, the world's first hydrogen fuel cell motorcycle. Seymour Powell works at the cutting edge of industrial design across a huge range of sectors covering everything from bras to cars and trains to planes for clients including Tefal, Unilever, Nokia and Honda.

Active

Designed by Artefakt, Active offers a wide choice of innovative fittings that combine a distinctive design and high performance features to guarantee quality, comfort and ease of use.

Sleek straight lines are complemented by soft gentle contours to create a contemporary look. Multi-port cartridge technology, the Top Fix system and a host of other features ensure that all Active fittings provide consistent water pressure and are easy to install. The 'cool body' feature on thermostatic fittings provide safe use especially to vulnerable users.

The multi-port cartridge brings a unique feature for easy temperature control. A single lever controls the pressure and temperature within a unique comfort zone, between 30-45°C. This gives more sensitive control and provides smooth effortless handle operation even at high pressures. See fig.1-4 p159.

innovation

Active

No cold shocks, no scalding surprises. With Active's thermostatic valves ready and waiting to deliver your shower consistently at just the right temperature, you can start to unwind before you've even turned on the tap. Our attention to technical innovation means your daily pampering is nothing short of pure luxury.

design

Award-winning

Ideal Standard received the Product Design Award 2007 for Active, designed by Artefakt. Achim Pohl and Thomas Fiegl founded Artefakt industriekultur in 1989. In collaboration with the international industry the ten man design team develops product lines based on a philosophy of simplicity, sensuality and constancy. This has been the basis for the success of their multiple awarded product developments.

Twin Sealing system

The built-in mixer is simple and easy to install. A water-proof foam seal within the faceplate sealing gasket compresses to form a flexible seal over uneven surfaces. The second seal fits into the tiling trim surrounding the valve in the wall providing an additional seal against water penetration – the perfect choice for uneven surfaces such as handcrafted tiles or mosaics.

performance

Cool Body technology

Cool body technology ensures the fitting remains safe to touch, giving you added peace of mind.

Waterways CD

The flowing Waterways design with its ceramic disc (CD) technology offers unsurpassed choice in bathroom co-ordination. The ceramic disc cartridge mechanism turns the water from the 'off' position to fully 'on' in an ultra smooth quarter turn. Ergonomic and compact, it has an outstanding range of tap handle options including Aero, Tipó and Axis, offering flexibility in bathroom design. For Waterways with conventional valves and other handle options see pages 172 and 173.

Ceramix

Ceramix is a completely new range of bathroom fittings, beautifully styled and detailed, and incorporating innovative features. The single lever basin mixer and bidet mixer incorporate a CLICK cartridge that encourages water saving – the user lifts the handle until they feel a slight resistance. This resistance informs the user that the fitting is delivering only 50% of its maximum flow potential. Lifting the handle further enables the fitting to deliver maximum flow. All fittings work at low and high pressure except wall mounted fittings which are high pressure only.

- 1 **Basin mixer**
Single lever,
with pop-up waste
- 2 **Bidet mixer**
Single lever,
with pop-up waste
- 3 **Shower mixer**

Roll mounted,
with shower kit

Ceramix single lever basin mixer with pop-up waste
Alto 60cm pedestal basin; see p48 for the complete range
Cone accessories used throughout; see p54 for the complete range

+ **Ceramic Disc technology**
 The multi-port cartridge brings a unique feature for easy temperature control. A single lever controls the pressure and temperature within a unique comfort zone, between 30-45°C. This gives more sensitive control and provides smooth effortless handle operation even at high pressures. See fig.1-4 p159.

innovation

Tratto

The single lever mixer is a practical, elegant design that does away with the clutter of separate taps. Streamlined and compact, Tratto incorporates the Ideal Standard ceramic disc technology at an affordable price.

- 1 Basin mixer
Single lever,
with pop-up waste.
- 2 Bidet mixer
Single lever,
with pop-up waste
- 3 Bath/shower mixer
Single lever, one tap hole
- 4 Bath filler
Single lever, one tap hole

Create: Edge 60cm basin; see p78 for the complete Edge bathroom range

Create furniture pedestal unit in oak; see p74 for the complete Create furniture bathroom range

Cone

A new range of contemporary minimalist taps, mixers and accessories designed by Robin Levien, Royal Designer for Industry. Ceramic discs are used throughout and the single lever bath filler uses the new smaller multiport cartridge which allows a slimmer profile yet still gives a rapid bath fill.

- 1 **Basin mixer**
Single lever, with pop-up waste
- 2 **Basin pillar taps**
(bath pillar taps also available)
- 3 **Bath filler**
Single lever, one tap hole
- 4 **Bidet mixer**
Single lever, one tap hole
- 5 **Bath filler**
Rim mounted, two tap holes
- 6 **Shower mixer**
Thermostatic, built-in TT
- 7 **Idealfill bath filler**
Low pressure bath filler and waste combination, see p178
- 8 **Bath/shower mixer**
Rim mounted, two tap holes

Cone Idealfill, low pressure bath filler and waste combination, see p158

Ceraplan SL

The Ceraplan SL collection is an innovative, beautifully styled range of precision-engineered mixer fittings that is versatile enough to complement many of our porcelain ranges. For the environmentally conscious, the CLICK cartridge in single lever basin and bidet fittings (see p158) encourages water saving by providing a helpful reference point when using 50% of the water flow. Our temperature control technology ensures safe hot water and the patented multi-port cartridge inside our bath and shower fittings will guarantee you a drip-free bath or shower. With its sleek, modern design, hidden technology and discreet method of fixing, the Ceraplan range is an ideal choice for any bathroom.

- 1 **Basin mixer**
Single lever, with or without pop up waste
- 2 **Basin pillar taps**
(bath pillar taps also available)
- 3 **Bidet mixer**
Single lever, with pop up waste
- 4 **Bath filler**
Single lever, one tap hole
- 5 **Bath mixer**
Dual control, two tap holes
- 6 **Bath/shower mixer**
Dual control, two tap holes
- 7 **Bath/shower mixer**
Single lever, one tap hole
- 8 **Bath/shower mixer**
Single lever, exposed manual
- 9 **Shower mixer**

+ **Ceramic Disc technology**
The multi-port cartridge brings a unique feature for easy temperature control. A single lever controls the pressure and temperature within a unique comfort zone, between 30-45°C. This gives more sensitive control and provides smooth effortless handle operation even at high pressures. See fig.1-4 p159.

innovation

Ceraplan Disc

Elegant styling and sleek design are combined across a range of eight contemporary fittings. Ceramic disc technology controls water flow with impeccable precision for a long lasting drip free operation.

- 1 **Basin mixer**
Dual control, with pop-up waste (basin mixer with chain and plug also available)
- 2 **Basin pillar taps**
(bath pillar taps also available)
- 3 **Bidet mixer**
Dual control, with pop-up waste
- 4 **Bath filler**
Dual control, one tap hole
- 5 **Bath filler**
Dual control, two tap holes
- 6 **Bath/shower mixer**
Dual control, one tap hole
- 7 **Bath/shower mixer**
Dual control, two tap holes

Ceraplan Disc dual control basin mixer with pop-up waste
Alto 60cm pedestal washbasin; see p46 for the complete Alto bathroom range

Ceraplan Duo

These fittings combine the superb design characteristics of Ceraplan with delicately sculpted conical handles to create a set of highly tactile fittings that deliver accurate water temperature and flow control. Dual control compression vales control the water flow offering the optimum performance for low pressure installations.

- 1 **Basin mixer**
Dual control,
with pop-up waste
(basin mixer with chain
and plug also available)
- 2 **Basin pillar taps**
Two tap holes (bath pillar
taps also available)
- 3 **Bidet mixer**
Dual control,
with pop-up waste
- 4 **Bath filler**
Dual control, one tap hole
- 5 **Bath filler**
Dual control, two tap holes
- 6 **Bath/shower mixer**
Dual control, one tap hole
- 7 **Bath/shower mixer**
Dual control, two tap holes

bath; see p28 for the complete
Purity bathroom range

Plaza

The angular grace of Plaza evokes the glamour of the Jazz Age and the range complements Ideal Standard's Art Deco-inspired Plaza porcelain suite. Plaza is the perfect choice for those seeking an Art Deco look for a period house. Yet its clean lines will also complement contemporary interiors. With individual pillar taps, mixers and the sought-after 'telephone' shower head cradle.

- 1 Basin pillar taps
(bath pillar taps
also available)
- 2 Bidet mixer
- 3 Bath/shower mixer

Plaza bath/shower mixer

Important installation information

A key element in the performance of a bathroom is the quality of the installation. We recommend you use a plumber from a registered association (see below) and consult him (or her) right from the start. Your local Ideal Standard stockist may offer a plumbing service or, if not, will be able to recommend a qualified plumber. Local showroom information and advice about installation and planning is available from the Bathroom and Shower Information Service www.thebathroom.info

Ideal guarantee

Our confidence in the quality and reliability of Ideal Standard products enables us to guarantee all ceramic products (including accessories) and Idealite shower trays for a lifetime and Idealcast and Idealform acrylic baths for 25 years from date of purchase.

Whirlpool baths, Trevi showers, bath panels, mixers and taps, wc suite and cistern fittings are guaranteed for 5 years from date of purchase. Shower enclosures and bath screens are guaranteed for 10 years from date of purchase. Parts (including flushvalves) are guaranteed for 5 years and will be replaced if found to be faulty. Whirlpool bath systems (including all components) are guaranteed for 2 years from the date of purchase. The guarantee does not cover general wear and tear.

Our guarantee is offered on all products that have been used in the manner for which they were intended, and does not apply to any products that have been misused or abused in any way. Products must be installed and cared for in line with our fixing instructions and local water byelaws. The guarantee covers products in domestic use by the consumer and not commercial or business use.

In the unlikely event the product fails within the guarantee period, we offer a free replacement or replacement part (or nearest equivalent). Liability is limited to individual products and does not cover consequential loss or damage on installations. When your bathroom has been satisfactorily installed and is working well, please ensure you register your guarantee. The guarantee is transferable – it applies to the product not the purchaser provided guarantee registration details are passed on to the new owner. You can register for guarantees on a bathroom bought on your behalf by a plumber or builder.

Applies to UK and Republic of Ireland only. This guarantee does not affect your statutory rights.

Ideal Standard pursues a policy of continuing improvement in design and performance of its products. The right is therefore reserved to vary specifications without notice.

*Ideal
Standard*

Introducing the new Ideal Standard brand logo. We are changing the look and feel of our logo, with a new soft and graceful shape, conveying a refined contemporary feeling. Our current signature will remain visible for a while on the Ideal Standard collections until it is progressively replaced by the new logo. You can rest assured that our brand and products will more than ever facilitate and enhance your life.

Colour reproduction is as accurate as possible within the limitations of the printing process.
