

## customer/technical services

For any technical or installation queries please contact Vado on 01934 745163.

## guarantee

This product is guaranteed against manufacturing defects from the date of purchase until the expiry of the relevant guarantee period shown below.

### The guarantee is only valid if:-

1. The product has been installed, used and maintained in accordance with Vado's instructions and subjected to normal use only.
2. The defect is not due to use of an unsuitable or inadequate water or power supply.
3. The defect is not due to accident, misuse, neglect or repair other than by Vado or Vado authorised agents or damage caused by foreign objects or substances.
4. We have received from you the completed Guarantee Registration Form. Vado accepts no responsibility for any forms lost in the post and returns by registered means is therefore recommended.

Under this guarantee (which is non-transferable) Vado will, at its option, repair or replace free of charge any product (or replacement part) found to be defective. The guarantee does not extend to any consequential loss or damage. After repair or replacement the relevant guarantee period will be calculated from the original date of purchase.

### The relevant guarantee periods are:-

1. Twelve years on chrome finish products.
2. Three years on all other products with the exception of Stuart Turner Pumps which carry a 2 year Guarantee on Monsoon Range and 1 Year Guarantee on Showermate Range.

All claims under the guarantee must be submitted in writing to the person who supplied the product to you and must be received no later than the last day of the relevant guarantee period. All claims must be accompanied by proof of purchase (sales receipt or delivery note).

Vado operates a policy of continuous product development and therefore reserves the right to change the product, packaging and documentation specifications without notice.

This guarantee is in addition to and does not affect your statutory rights as a consumer.

## installation & maintenance instructions

# nuance

floor mounted bath shower mixer with shower kit

**please leave these instructions with the customer**

## important - please read

Please read these instructions carefully before starting installation and keep for future reference.

Remove all packaging and check the product for missing parts or damage before starting installation.

Any alterations made to this product and fittings may infringe water regulations and will invalidate the guarantee.

The installation must comply with all Local/National Water Supply Authority Regulations/Byelaws and Building and Plumbing (UK:BS6700) Regulations.

We strongly recommend that you use a qualified and registered plumber.

## general installation

These fittings are mixing devices and therefore water supplies must be reasonably balanced.

Where connections are made to the mains cold water supply, WRC approved single check valves must be fitted to both hot and cold inlets. This is a stated requirement of Water Supply (Water Fittings) Regulations 1999 Schedule 2, Section 6 G15.13.2

Before making any inlet pipe connections, all supply pipes MUST be thoroughly flushed to remove debris. Failure to do so could result in damage or low flow from the mixer unit. Water Supply (Water Fittings) Regulations 1999 Schedule 2 Section 4 G13.1

The fitting of isolating valves to the inlet feeds is advised for ease of maintenance.

Please take great care when installing this mixer not to damage its surface.

Please note if installing in an enclosed environment, access should be left for servicing and maintenance. No costs relating to inadequate access can be accepted.

## care of the mixer

Our products are finished to the highest standard and due care needs to be taken to ensure their looks are retained.

We recommend cleaning all products with a soft damp cloth ONLY and advise strongly against the use of ALL cleaning products i.e. powders and liquids.

If the above instructions are not followed this will invalidate your guarantee in the event of a problem occurring.

## installers/users notes

## installation - showerhead

### Showerhead

Place one of the rubber washers into the cone end of the hose and screw to the Showerhead.

Place the second rubber washer into the other end of the hose and attach it to the mixer outlet.

## operation

## dimensions

## Operating Specifications

Hot Water Supply Temperature:  
 Maximum: 85° C  
 Minimum: 10° C higher than the maximum required mixed temperature (advise 65° C)  
 Minimum operating pressure 3 bar  
 Maximum operating pressure 5 bar

## installation

Before installing your new mixer, flush through the pipework to ensure removal of debris, turn off the water supply.

**Warning!** Please check for any hidden cables and pipes before drilling holes.

Position the seat and mark the 3 fixing holes, remove the seat and drill the 3 x 12mm holes to the required depth.

Insert the expansion bolts into the holes. Slide the seat over the studs followed by the 3 washers and nuts. Use the adjusting screws to level the seat, when satisfied with the level finally tighten down the bolts.

Connect the inlet pipes to the seat with the hot on the left and cold on the right.

## installation

Finish the floor covering down to a diameter of 75 to 89 mm.

Remove the 2 screws and pull out the safety cover.

Insert the main body assembly into the seat, tighten the fastening plate, and cover with the escutcheon.
