ENGINEERED TO THE HIGHEST STANDARDS

Our products are built to exacting standards at one of the sophisticated world-wide manufacturing facilities. For your reassurance, Showerlux UK is certified to ISO 9001: 2008.

NO COMPROMISE ON QUALITY

Only the very best will do when it comes to the materials we use to make our shower enclosures. For example, for the flat glass in your shower we only use toughened safety glass to BS EN 12150, whilst our frames are rigidly constructed from BS high-grade aluminium alloy.

GLASS SHIELD

EASY CLEAN GLASS PROTECTION

Glass
SHIELD

STANDARD ON
ALL OUR RANGES

Without Glass Shield

With Glass Shield

Glass Shield coating reduces the amount of dirt and water trapped on glass surface

Natural glass surface

When you've chosen a luxury shower enclosure it's only natural that you'll want to maintain it in sparkling new condition, which is why our factory applied Glass Shield easy clean glass protection is standard on all ranges.

PROTECTIVE TECHNOLOGY THAT SHINES

Before you select your luxury Showerlux enclosure you might be interested to know that we treat every single product in our range with a special protective coating to ensure the glass maintains its sparkle. Shower after shower. Day after day.

And unlike many other enclosure manufacturers this isn't at an additional cost to you, we do it absolutely free of charge as part of our ongoing commitment to first class service.

Developed with you, our customer, in mind Glass Shield easy clean glass protection has been carefully engineered so the glass will remain shiny and new without the need for tiresome scrubbing and polishing.

THE SCIENCE PART

Under high magnification natural glass surface is textured which allows moisture and dirt to become trapped.

Through the use of nano technology, Showerlux has incorporated Glass Shield, a non stick invisible barrier made up of microscopic particles that quite literally organise and bind themselves permanently to the glass surface.

It is a fact that using your shower regularly will create soap and limescale deposits on the glass of your enclosure, which over time, can make the glass surface look stained and dull.

When your enclosure is protected with Glass Shield, the special coating lowers surface friction, making it easier for any water, soap and lime deposits to run off the glass.

Applied during the Showerlux manufacturing process, Glass Shield will last from months to years, depending on the frequency of use and hardness of the water in your area. It will never crack peel or discolour.

TIPS TO KEEP YOUR ENCLOSURE IN PRISTINE CONDITION

After each shower - remove residual water from the glass and aluminium profiles using a damp cloth or the Showerlux wiper blade provided with your enclosure.

As all Showerlux enclosures are coated with Glass Shield, regularly use our Glass Shield maintainer after care products. Aluminium frames should also be cleaned regularly with warm soapy water, to avoid the build up of soap deposits.

DO NOT use solvent or abrasive cleaners as this may damage the glass, metal and plastic parts, and may affect the performance of Glass Shield. Showerlux Glass Shield coating is not compatible with some other manufacturers glass coatings. Always use genuine Showerlux maintainer for aftercare.

Linea Touch twin slider (in a recess)

LINEA TOUCH SLIDER

Linea Touch features luxurious and contemporary enclosures with ultra slim aluminium frames to provide a stunning centrepiece for any bathroom.

Despite the recent changes in bathroom styles and the move towards more design driven spaces, sometimes all you need is a door. However, Linea gives you much more than just a door.

LINEA TOUCH DESIGN TOUCHES

- Luxurious contemporary framed enclosure
- Slimline aluminium frames
- Distinctive and stylish handles
- Slim magnetic sealing for minimal styling with watertight confidence
- Concealed fixings
- Adjusting frames for out of true walls
- 6mm and 8mm flat tempered safety glass manufactured to BS6206 Class A or BS EN 12150
- Complete with Glass Shield easy clean glass protection as standard (see page 3)
- **Linea slider** - twin sliding 8mm doors provide optimum access without sacrificing space
- **Linea slider** - top and bottom rollers for luxurious smooth opening action.

Glide extension profiles

description	25mm extension profile for Glide shower doors and side panels
code	6802500000
RRP inc. VAT	£94.80

Frame finishes	Platinum Silver
Glass Screen options	Clear
Glass Shield	Included as standard

GLIDE SPECIFICATION INFORMATION

Height	1900mm excluding tray
Handing	Please note products are universal. Single doors can be installed with left or right access (excluding offset versions)
Single door offset round	The 900mm x 800mm has 2 panels only, meaning door access is handed. Please ensure access to the enclosure is available prior to purchase. 1200mm x 800mm & 1200mm x 900mm have central access.
Side Panel	When used with a side panel the adjustment of a Glide door will become identical to the adjustment of a side panel the same size.
Glass Thickness	6mm on all quadrants, sliders and side panels 8mm on pivot and bifold doors 8mm on Inline Pivot and Bifolds doors and 6mm on fixed inline panel.
Trays	All Glide round and offset round enclosures are compatible with 550mm radius shower trays

GLIDE MAXI SPECIFICATION INFORMATION (DEDICATED TRAY)

Tray finish	White
Height	Standard tray height (does not include footsets and panel) 45mm Raised tray height (includes footsets and panels) 140mm
Tray Specification	Acrylic capped ABS stone resin showertray. Waste size: 90mm
