WATER SAVING INNOVATION FROM TWYFORD

Twyford lead the way in water conservation - and the Alcona collection incorporates our latest innovations, reducing water consumption right across the range, from WC flushes to taps, shower heads and bath capacities. All with no compromise on quality or performance - and all helping you fulfil the latest water regulations and legislation.

Water saving WC

Use 60% less water with our 4 or 2.6 litre dual flush system

Our wall hanging, back-to-wall and close coupled Alcona WCs feature Twyford's ground-breaking 4 or 2.6 litre dual flush system - which cuts the amount of water needed for the perfect flush by up to 60%. Our Flushwise® WC range has been awarded the Waterwise Marque and supports the Code for Sustainable Homes.

Water saving tap

The Aquations low flow dual action tap delivers water savings every time

Our unique dual action tap delivers water at 2.5 litres a minute with one click back, and 5 litres a minute with two clicks. You can choose the rate of flow, but either way - even with high pressure systems - it saves water every time.

Water saving baths

Save water without compromise

Twyford Bathrooms offer a comprehensive range of baths in acrylic and steel, delivering outstanding water savings along with a comfortable, satisfying bathing experience.

Our **Signature acrylic bath** has a capacity of just 140 litres to the overflow - an estimated 35% less than the average UK bath. It is a standard size and achieves this reduction by clever internal shaping which still provides a relaxing bath.

Our new **Celtic low volume steel bath** retains a standard shape and size but also has a capacity of only 140 litres to the overflow.

Water saving bath/shower mixer

Showering that saves water too

The Aquations low flow bath/shower mixer provides a great shower but saves water too, delivering 6 litres a minute on the shower function, but with an unrestricted flow on the bath filler, allowing you to fill the bath quickly - combining performance with water savings.
