For any technical or installation queries please contact Vado on 01934 745163.

Guarantee

This product is guaranteed against manufacturing defects from the date of purchase until the expiry of the relevant guarantee period shown below.

The guarantee is only valid if:-

1. The product has been installed, used and maintained in accordance with Vado's instructions and subjected to normal use only.
2. The defect is not due to use of an unsuitable or inadequate water or power supply.
3. The defect is not due to accident, misuse, neglect or repair other than by Vado or Vado authorised agents or damage caused by foreign objects or substances.
4. We have received from you the completed Guarantee Registration Form. Vado accepts no responsibility for any forms lost in the post and returns by registered means is therefore recommended.

Under this guarantee (which is non-transferable) Vado will, at its option, repair or replace free of charge any product (or replacement part) found to be defective. The guarantee does not extend to any consequential loss or damage. After repair or replacement the relevant guarantee period will be calculated from the original date of purchase.

The relevant guarantee periods are:-

1. Twelve years on chrome finish products.
2. Six years on Vado Identity products.
3. Three years on all other products with the exception of Stuart Turner Pumps which carry a 2 year Guarantee on Monsoon Range and 1 Year Guarantee on Showermate Range.

All claims under the guarantee must be submitted in writing to the person who supplied the product to you and must be received no later than the last day of the relevant guarantee period. All claims must be accompanied by proof of purchase (sales receipt or delivery note).

Vado operates a policy of continuous product development and therefore reserves the right to change the product, packaging and documentation specifications without notice.

This guarantee is in addition to and does not affect your statutory rights as a consumer.

Installation & maintenance instructions

Victoriana & Kensington

3 hole deck mounted concealed basin mixer

NOTE: For illustrative purposes only the Victoriana range is shown.
Please follow the same procedure to install the Kensington range
Please leave these instructions with the customer

Important - please read

Please read these instructions carefully before starting installation and keep for future reference.

Remove all packaging and check the product for missing parts or damage before starting installation.

Any alterations made to this product and fittings may infringe water regulations and will invalidate the guarantee.

The installation must comply with all Local/National Water Supply Authority Regulations/Byelaws and Building and Plumbing (UK:BS6700) Regulations.

We strongly recommend that you use a qualified and registered plumber.

General installation

These fittings are mixing devices and therefore water supplies must be reasonably balanced.

Where connections are made to the mains cold water supply, WRC approved single check valves must be fitted to both hot and cold inlets. This is a stated requirement of Water Supply (Water Fittings) Regulations 1999 Schedule 2, Section 6 G15.13.2

Before making any inlet pipe connections, all supply pipes MUST be thoroughly flushed to remove debris. Failure to do so could result in damage or low flow from the mixer unit. Water Supply (Water Fittings) Regulations 1999 Schedule 2 Section 4 G13.1

The fitting of isolating valves to the inlet feeds is advised for ease of maintenance.

Please take great care when installing this mixer not to damage its surface.

Please note if installing in an enclosed environment, access should be left for servicing and maintenance. No costs relating to inadequate access can be accepted.

Operating Specifications

Hot Water Supply Temperature:

Minimum: 10° C higher than the maximum required mixed temperature (advise 65° C)

Maximum: 85° C

Minimum operating pressure 0.5 bar.

Maximum operating pressure 5 bar

Care of the taps

Our products are finished to the highest standard and due care needs to be taken to ensure their looks are retained.

We recommend cleaning all products with a soft damp cloth ONLY and advise strongly against the use of ALL cleaning products i.e. powders and liquids.

If the above instructions are not followed this will invalidate your guarantee in the event of a problem occurring.

Operation - ceramic disk version

Hot tap - moving the tap clockwise will increase the flow of hot water.

Cold tap - moving the tap anti-clockwise will increase the flow of cold water.

Dimensions

Victoriana deck mounted basin mixer

Victoriana handles

Kensington handles

Installation - tap

Before installing your new tap, flush through the pipe work to ensure removal of debris, turn off the water supply.

Mark the position of the taps and the spout to the desired location, not exceeding a maximum distance of 210mm between tap and spout. Drill 3 x 30mm holes.

Identify the taps hot should be on the left and cold on the right.

Unscrew the handle cover, remove the screw and pull off the control handle, unscrew the cover and base.

Screw the nut on the valve down to the bottom. Push the valve up through the hole in the basin making sure the outlet hole is pointing in the right direction (towards the spout).

Place the 'O' ring into the groove on the underside of the base and screw onto the valve. Fully screw on the cover and then unscrew the base until it touches the bottom of the cover.

From the underside tighten the nut to secure the valve.

CAUTION: Do not over tighten the nut as this might damage the work top.

Repeat for the other tap.

Connect the water supply to the inlet pipes. The hot water should be connected to the left hand tap.

Installation - spout

Place the 'O' ring into the groove on the underside of the base.

Position the spout in place, and from the underside slide on the rubber washer and then the nut. Tighten the nut to clamp on the spout.

CAUTION: Do not over tighten the nut as this might damage the work top.

Screw on the tee making sure that the inlets are pointing towards each tap, connect the spout to each tap using the flexible pipes.
