For any technical or installation queries please contact Vado on 01934 745163.

guarantee

This product is guaranteed against manufacturing defects from the date of purchase until the expiry of the relevant guarantee period shown below.

The guarantee is only valid if:-

1. The product has been installed, used and maintained in accordance with Vado's instructions and subjected to normal use only.
2. The defect is not due to use of an unsuitable or inadequate water or power supply.
3. The defect is not due to accident, misuse, neglect or repair other than by Vado or Vado authorised agents or damage caused by foreign objects or substances.
4. We have received from you the completed Guarantee Registration Form. Vado accepts no responsibility for any forms lost in the post and returns by registered means is therefore recommended.

Under this guarantee (which is non-transferable) Vado will, at its option, repair or replace free of charge any product (or replacement part) found to be defective. The guarantee does not extend to any consequential loss or damage. After repair or replacement the relevant guarantee period will be calculated from the original date of purchase.

The relevant guarantee periods are:-

1. Twelve years on chrome finish products.
2. Three years on all other products with the exception of Stuart Turner Pumps which carry a 2 year Guarantee on Monsoon Range and 1 Year Guarantee on Showermate Range.

All claims under the guarantee must be submitted in writing to the person who supplied the product to you and must be received no later than the last day of the relevant guarantee period. All claims must be accompanied by proof of purchase (sales receipt or delivery note).

Vado operates a policy of continuous product development and therefore reserves the right to change the product, packaging and documentation specifications without notice.

This guarantee is in addition to and does not affect your statutory rights as a consumer.

installation & maintenance instructions

ingot

wall mounted rectangular shower head with
water blade & cascade shower

please leave these instructions with the customer

important - please read

Please read these instructions carefully before starting installation and keep for future reference.

Remove all packaging and check the product for missing parts or damage before starting installation.

Any alterations made to this product and fittings may infringe water regulations and will invalidate the guarantee.

The installation must comply with all Local/National Water Supply Authority Regulations/Byelaws and Building and Plumbing (UK:BS6700) Regulations.

We strongly recommend that you use a qualified and registered plumber.

general installation

These fittings are mixing devices and therefore water supplies must be reasonably balanced.

Where connections are made to the mains cold water supply, WRC approved single check valves must be fitted to both hot and cold inlets. This is a stated requirement of Water Supply (Water Fittings) Regulations 1999 Schedule 2, Section 6 G15.13.2

Before making any inlet pipe connections, all supply pipes MUST be thoroughly flushed to remove debris. Failure to do so could result in damage or low flow from the mixer unit. Water Supply (Water Fittings) Regulations 1999 Schedule 2 Section 4 G13.1

The fitting of isolating valves to the inlet feeds is advised for ease of maintenance.

Please take great care when installing this mixer not to damage its surface.

Please note if installing in an enclosed environment, access should be left for servicing and maintenance. No costs relating to inadequate access can be accepted.

installers/users notes

care of the mixer

Our products are finished to the highest standard and due care needs to be taken to ensure their looks are retained.

We recommend cleaning all products with a soft damp cloth ONLY and advise strongly against the use of ALL cleaning products i.e. powders and liquids.

If the above instructions are not followed this will invalidate your guarantee in the event of a problem occurring.

Shower head nozzle maintenance.

To remove any build up of Limescale on the shower, rub the nozzles with your thumb gently.

We advise this to be carried out on a weekly basis.

dimensions

Operating Specifications

Minimum operating pressure 1.5 bar.

Maximum operating pressure 5 bar

installation

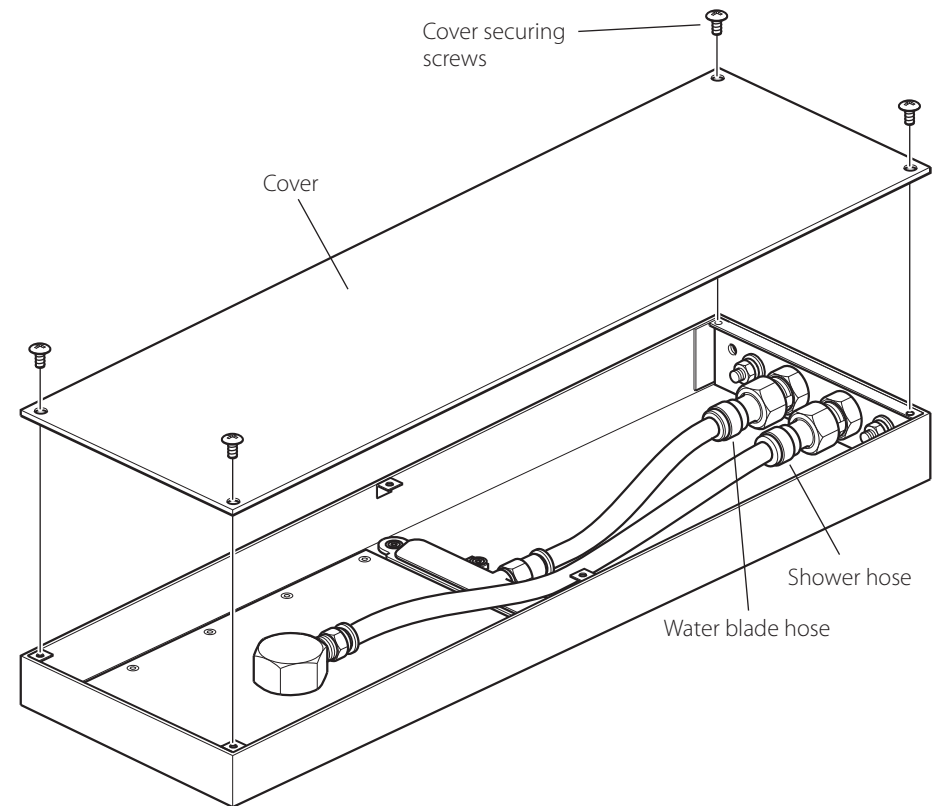

Before installing your new mixer, flush through the pipework to ensure removal of debris, turn off the water supply.

⚠ Warning! Please check for any hidden cables and pipes before drilling holes. In the required position drill the 2 fixing bolt holes 45mm deep and with 100mm centres, remove the nut, spring washer and washer and insert the fixing bolts. Prepare the wall with 2 flush 1/2" connectors at 40mm centres (see dimension page). Connect the water supply to the connectors, left for the water blade and right for the shower. Using PTFE tape screw each connecting tube into the flush connectors and tighten

Slide the body over the bolts and connectors. Slide on a plain washer a spring washer and a nut onto each fixing bolt and tighten, before finally tightening check for level, when satisfied tighten down the bolts. Screw a nut onto each connecting tube and tighten.

installation

Connect each hose to the connecting tubes, left for the water blade and right for the shower.

Turn on the mains stop cock, and check for any leaks.

Fit the cover using the 4 x supplied screws.
