Love your bathroom, give it a heart, give it a Triton.

Triton have been at the heart of Britain’s bathrooms for more than 30 years. And there’s a simple reason why we’ve stayed in the affections of the British family home for so long; we care.

We care about making a quality product that lasts for life. So all of our models are expertly engineered and rigorously tested 7,500 times. We also care about design, making stylish fittings affordable for everyone. And we care about our customers, after all, we wouldn’t have got very far without them.

Whatever type of shower you choose, whatever style you want, every shower we make looks beautiful and works beautifully. That’s because not only are all our models individually tested but they are each backed by a Triton guarantee covering against all mechanical and electrical defects from the day you buy it.

5 year guarantee: Selected mixer showers are guaranteed for 5 years for domestic use.

3 year guarantee: 3 year mixer guarantees with the option to extend to 5 years.

2 year guarantee: Electric showers and T22i twin impeller booster pump are all guaranteed for 2 years for domestic use, with the option to extend to 5 years.

1 year guarantee: All power showers, shower towers and pumps* are guaranteed for 1 year for domestic use, with the option to extend to 5 years.

* Excludes T22i

Quality assured: Triton showers have achieved ISO 9001 accreditation for their safety and quality. Our electric and power showers comply with BEAB safety standards, CE marking and British kite mark.

Unbeatable range: Our extensive range of showers offer incredible style and function at affordable prices. We also design and manufacture a comprehensive range of bathroom fittings and accessories to complete the look.

Outstanding customer service: Our dedicated team of over 50 Customer Service Operators are there to help if you need further information on how to choose, install or maintain your Triton shower. In the unlikely event of a fault occurring with your shower, we have a nationwide network of Service Engineers ready to help.

Environmentally friendly: With a reputation built on trust it’s only fitting we should also look to the future. Our range of environmentally friendly showers reduce water consumption, not performance and we conform to EMS ISO 14001 which includes internal material recycling policies and environmental initiatives. We are looking at ways in which renewable energy can save money and minimise any negative impact on the environment. We are committed to the future with eco showers adhering to the Code for Sustainable Housing, making responsible choices easy for everyone.

Wireless: Our team of designers strive to keep Triton at the forefront of technology and consistently listen to our installers’ and customers’ needs. For example, our digital range of showers are available with wireless technology to offer more design freedom.

The heart of every bathroom.

What sort of system do you have?

One of the first questions you need to ask when you're choosing a new shower is "Do I have a high or a low pressure water system?" because this will determine the type of shower unit that is suitable and offers the best performance. It's also worth noting that electric showers are suitable for use with any plumbing system because they heat water instantly from the cold mains or in some cases a cold water cistern.

High pressure water systems

If you have a hot water tank (cylinder), usually found in your airing cupboard, but you don't have a cold water tank (cistern) in your loft or garage, this is an unvented high pressure system. This can look similar to a low pressure system so check carefully to avoid confusion. Also take caution in refurbished houses with disused water tanks.

If you have a Combination (Combi) boiler which heats water on demand so there is no hot water storage cylinder or cold water tank, you have a high pressure system.

If you have either of these two set-ups, simply choose from our extensive range of High Pressure showers indicated by the relevant symbol illustrated above (H or A).

Temperature control explained

You'll notice some of our showers are described as Temperature Stabilised and some as Thermostatic. This refers to their method of temperature control.

Temperature Stabilised

Electric showers stabilise the water temperature when fluctuations occur in your water supply, for example when someone flushes a toilet or the washing machine is running.

Thermostatic

Electric, Mixer and Power showers actively regulate the water temperature when fluctuations occur in your water supply or inlet temperatures. They offer you more precise control and greater safety.

The shower symbols explained

Look for the following symbols on our showers

Showers that are suitable for both High and Low pressure systems.

Showers that are suitable for High pressure systems.

Showers that are suitable for Cold Mains systems.

Showers that are suitable for Low pressure systems.

Showers that are suitable for Low pressure systems when used with a pump.

Low pressure water systems

If you have a cold water tank (cistern) in your loft and a hot water tank (cylinder) in your airing cupboard, this is a gravity-fed system. It's the most common household plumbing system and means you have a low pressure water system.

Having low pressure need not limit your choice of shower type. If your hot water cylinder is large enough, simply choose from our extensive range of Low Pressure suitable showers indicated by the relevant symbol illustrated above (L or A).

If your hot water cylinder is large enough and you want a more powerful shower, it is possible to boost your system with a pump (see page 77 for details).

Low pressure water systems when used with a pump

As low pressure water systems above, but only suitable if used with a pump indicated by the relevant symbol illustrated above (P). Refer to page 79 for pump installation.

Cold mains

All our Electric showers can be connected to a cold water mains supply, simply choose from our extensive range of Electric showers indicated by the relevant symbol illustrated above (C).

If your cold mains does not have the required regulated minimum pressure, select the T150Z pumped, T90xr pumped or Safeguard pumped electric showers or choose the T450i separate booster pump to feed from a cold water tank (cistern) in your loft (see pages 20, 31, 32 and 77 for product details).

The Triton shower range explained

Digital Showers

Pages 10 to 17.

Triton Digital showers offer an unbeatable combination of state of the art technology, stylish choices, freedom and ease of installation. They offer you a simple and innovative new way to fit and enjoy Britain's best loved shower.

- Shower controlled by a panel that communicates with the shower's power unit to adjust flow and temperature
- Power unit is usually installed in a loft or airing cupboard
- Hot water delivered through either the ceiling or wall, depending on installation
- The control panel can be located within a 10m radius giving you more freedom in your bathroom layout
- No unsightly plumbing on show
- Digital showers are available in either Mixer or Electric variations

The wireless models offer more design freedom, whilst the remote range is connected to the control unit by a completely hidden wire.

Electric Showers

Pages 18 to 31.

Electric showers draw on a cold water supply and heat the water on demand.

- Cold water is heated by an element providing hot water instantly
- Quick and easy to install
- Extremely economic (99.7% energy efficient) with no hot water wastage
- Choose a higher kilowatt rating for better flow performance
- Choose from a range of styles and finishes including white/chrome, satin/chrome, chrome, tiled and glass.

Care Range

Pages 32 to 33.

A range of showers that focus on independent living solutions.

- Available in electric, mixer or pumped showers offering a solution for most plumbing systems
- Specifically designed showers with easy to use features for independent safe showering
- A selection of products that are RNIB, BEAB care or TMV endorsed for extra safety assurance

Mixer Showers

Pages 34 to 59.

Mixer showers draw from both hot and cold water supplies and usually deliver higher flow rates.

- Ideal for homes with readily available hot water such as a combi boiler or large capacity hot water cylinder
- Hot and cold water is mixed within the unit and the water delivered through the shower
- Shower options include fixed head, adjustable head, and handset on a riser rail
- Mixers with a diverter gives the option for multiple outlets from the shower unit

Shower Towers

Pages 60 to 61.

Shower towers are wall mounted with incorporated body jets. Draws on both hot and cold water supplies.

- Offer a combination of shower sensations including multiple body jets, a fixed head and a handset
- Their high flow rate means they are only suitable for high pressure systems
- Low pressure systems can be boosted with a pump

Power Showers

Pages 62 to 64.

Power showers draw from both hot and cold water supplies and include an integrated pump to boost the flow rate.

- Offer low pressure systems the option of a high flow rate shower
- Hot and cold water is mixed within the unit and the water is delivered through the shower

Eco Showers

Pages 66 to 67.

A range of showers with a focus on water efficiency.

- Available in electric or mixer variations
- Offer up to a 50% reduction in water usage when compared to conventional mixer showers
- Meets the needs of the Code for Sustainable Housing

Digital Showers.

The Digital range incorporates an exciting new development in shower technology, with a choice of either wireless or remote shower solutions. Designed to give you more freedom in the layout and set-up of your bathroom these systems hide the power unit out of sight. The shower is operated by a separate control panel, which is either connected by a hidden wire to the power unit or works via wireless technology. Available in Mixer or Electric models, whichever you decide on, a digital shower will lend your bathroom a sleek and simple elegance.

Satellites wireless thermostatic mixer shower

Metis

This understated and neat riser rail with 5 position showerhead can either be used for loft or cupboard installations.

Sirona
Control panel
Code: SATMIXSIR-HP
SATMIXSIR-LP

Metis
Code: KITSATMET

Three steps to the Satellites range

1. Choose your mixer unit

There are 2 types of mixer unit for the Satellites system; High Pressure or Low Pressure. Choose the unit that suits your water system. If you don't know whether you have high or low pressure see pages 6 and 7 for full information.

2. Choose your installation

Depending on the layout of your home and existing plumbing, a Satellites system can be installed in two ways. A typical loft installation will require a shower kit with a through the ceiling riser rail connecting to the mixer. A typical airing cupboard installation requires a shower kit, that connects the outlet hose to the shower hose through the wall, with a bulkhead.

3. Choose your shower kit

Choose from 5 riser and handset options: Mellena, Bellona, Metis and Carlova, or the large, fixed head Cyrene to complement the Sirona control panel.

Satellites wireless thermostatic mixer shower

Mellena

This combines a riser rail, handset and fixed shower head in one solid contemporary and stylish kit. A diverter control allows you to switch between fixed head and handset or a mixture of both. Suitable for loft installations only.

Design freedom – position the remote control anywhere within 10 metres of the power unit

Extensive choice – pick any kit that can be installed traditionally or through the ceiling

Thermostatic control – constantly regulated temperature gives you more precise control and safer showering

Warm-up setting – starts the shower and then stops the water flow once it reaches your chosen temperature to let you know it's ready to use

Automatic shutdown – should either the hot or cold water supplies fail

Adjustable Timed Shutdown – set the shower to automatically shutdown after a pre-selected time

Adjustable maximum temperature stop – reduces the risk of accidentally turning the temperature too high

Flow Control – enjoy a powerful flow of water or switch the 'economy' button on to reduce the flow and water consumption

Stylish contemporary designs – easy to use and easy to clean

Fixed showerhead – Single spray pattern

Single spray pattern handset

Satellites

wireless thermostatic
mixer showers

Bellona

This sleek riser rail and handset incorporates 3 multi-spray body jets in a sleek and minimal design. Position the shower head in either the overhead position for a forceful downpour or lower for a softer shower experience. Suitable for loft installations only.

Carlova

This elegantly curved riser rail and chrome handset can either be used for loft or cupboard installations.

Cyrene

This large, ceiling fitted, fixed chrome showerhead makes a stylish and bold statement in any bathroom. The Cyrene can be fitted as close to the ceiling as you like or up to 485mm below it, simply cut the pipe to the required length. Suitable for loft installations only.

Aspirante

wireless electric shower

We’ve applied our wireless mixer technology to this stunning electric shower. The power pack and all the plumbing is hidden in a loft or cupboard and the only thing on show is a sleek riser rail and handset and the elliptical elegance of the polished chrome control panel. Suitable for cupboard or loft installations.

Aspirante

remote electric shower

This shower features the same elegant polished chrome control panel as the wireless model, the only difference is the controls are connected by a hidden wire to the power unit. Suitable for cupboard or loft installations.

- Design freedom** – position the Aspirante Wireless remote control anywhere within 10 metres of the power unit or within 3.5 metres for the remote version
- Extensive choice** – pick the remote for a traditionally installed kit or the wireless for the additional option of through the ceiling
- Double temperature protection** – automatically adjusts the power setting for additional showering comfort whilst ensuring the temperature does not exceed the safety limit
- Stylish contemporary designs** – easy to use and easy to clean
- Push button Start/Stop** – to select your favourite shower setting every time
- Phased Shutdown** – when the shower is turned off, the water continues to run for a few seconds to flush out pre-heated water before stopping completely
- ‘Low pressure’ indicator** – operates when the water pressure is insufficient
- Rub clean showerhead** – 5 spray pattern

Electric Showers.

Triton are famous for electric showers, and with good reason. Advanced shower technology and outstanding design are combined to maximum effect in our extensive range. From the sumptuous ellipse of the Aspirante Wireless, to the funky interchangeable Topaz fascias, and the simple, contemporary design of the Z range, there's a model to match any bathroom or budget. Whether it be LCD displays, phased shutdowns, intelligent thermostatic controls or economy settings, all our electric showers benefit from the Triton commitment to innovation and affordable style. When choosing your shower, remember that the higher the kW rating, the better the performance so there's always a shower suitable for you.

Inscriptions electric shower

Inscriptions allow you to introduce a little designer chic into your bathroom without the price tag.

The range is funky and fresh, sleek and seductive, meaning it couldn't be easier to achieve the look you're after. And with three distinct Inscriptions finishes: Pure Glass, Patterned Glass and Tiled, the designs are so versatile you're sure to find a style that's right for you.

Pure Glass

These three Pure Glass variations: Black Mirror, Aqua Blue and White, offer a clean, bold and sophisticated look to any style of bathroom.

Double temperature protection – automatically adjusts the power setting for additional showering comfort whilst ensuring the temperature does not exceed the safety limit

Push button Start/Stop – to select your favourite shower setting every time

Care products

As the maker of Britain’s best loved showers it is only natural that we would want everyone to be able to enjoy a Triton. That’s why we were the first manufacturer to produce an electric shower specifically designed for care users. Through in-depth discussions with carers and advice from, among other organisations, RNIB and BEAB, Triton have developed innovative solutions for independent living. Design features such as audible controls and clearly defined operating controls, are just some of the benefits that our extensive care range has to offer.

Safety Accreditation’s

To ensure that you receive a safe, quality product, Triton work with recognised standards bodies whom certify that our products meet their standards, delivering peace of mind for you and your family...

B.E.A.B Care mark is an accreditation developed for care establishments that require a higher level of temperature safeguards.

RNIB accreditation is achieved for showers designed for those visually impaired.

TMV3 is a standard created for thermostatic mixing valves that have enhanced thermal safety performance and comply with NHS Estates requirements.

TMV2 is an accreditation for thermostatic mixing valves that conform to BS-EN 1111 and 1287. Thermal safety performance for domestic mixer showers.

WRAS The Water Regulations Advisory Scheme which monitors and approves the use of materials and products in contact with water supplies to prevent contamination of the water supply.

Elina thermostatic mixer shower

Exposed

With its striking cylindrical face the Elina TMV3 exposed delivers style, function and extra safety assurance that you expect from a care or commercial shower.

Tamper proof lever controls

Factory set maximum temperature at 38°C

Ideal use for care homes, hospitals and nursing homes

Shower kit, riser rail and shower head each sold separately

Mixer Showers.

Triton Mixers offer a dazzling range of style and function. Each model is expertly designed to provide a consistently invigorating shower, so all you have to do is choose an option that suits you best. Our collection features showers to complement the 21st century bathroom, from the fashionable vertical mixers to the innovative space saving mini mixers. Triton Mixers provide an extensive choice of styles from contemporary to traditional and even Edwardian inspired controls. The range is endless and the quality unbeatable, the only hard part is deciding which one you like best.

Unichrome Thames
Shower Pole

Power Showers.

Triton Power Showers mean no one need be without the forceful and invigorating experience of a high flow rate shower. Designed for plumbing systems with low pressure these stylish showers combine a mixer and an integral pump in one easily installed unit. All of our Power Showers have been designed not only to boost performance but to enhance and compliment any style of bathroom. Designed with clean, simple lines the AS2000XT and AS2000X are discrete in white or the Aspirante model is available in a statement making chrome finish. Whichever you choose, you can be sure the power is a force to be reckoned with.

Aspirante
Power shower
Chrome
Code: ASP2000THM

Aspirante thermostatic power shower

Under a beautifully restrained polished chrome fascia, this power shower has an integrated pump that provides a luxuriously high flow rate of 14 litres per minute. Matched with an all chrome riser rail and handset this model offers optimum style and performance in any bathroom.

Thermostatic control – constantly regulated temperature gives the user more precise control and safer showering

Automatic shutdown – should either the hot or cold water supplies fail

Adjustable maximum temperature stop – reduces the risk of accidentally turning the temperature too high

Numbered temperature control – to select your favourite shower setting every time

Rub clean showerhead – 5 spray pattern

AS2000XT

thermostatic power shower

This thermostatically controlled shower is suitable for low pressure systems and delivers a flow rate of up to 14 litres of beautifully warm water per minute. The mixer and pump system is housed in a pristine white fascia and paired with a white/chrome riser rail and handset, to blend with any style of bathroom.

- Thermostatic control**
– constantly regulated temperature gives the user more precise control and safer showering

Automatic shutdown
– should either the hot or cold water supplies fail
- Adjustable maximum temperature stop** – reduces the risk of accidentally turning the temperature too high

Push button Start/Stop – to select your favourite shower setting every time

Rub clean showerhead – 5 spray pattern

AS2000X

manual power shower

Suited only to low pressure systems, this power shower also provides an outstanding flow rate of up to 14 litres per minute, but with manual temperature control.

- Adjustable maximum temperature stop** – reduces the risk of accidentally turning the temperature too high
- Push button Start/Stop** – to select your favourite shower setting every time

Low pressure?

No problem.

If you have your heart set on a mixer model that requires high pressure, a shower tower for instance, but you have low pressure, don't worry because it is possible to boost it. Choose the mixer shower you want then connect a Triton T22i pump to your system and you can have a high pressure flow rate from a low pressure system. The pump can be hidden in an airing cupboard or under the bath, so you can simply enjoy a luxurious powerful and stylish shower while the hard work goes on behind the scenes.

An increased flow rate may mean you have to increase the capacity of your hot and cold water tanks, so ask your plumber about the system you have. For more information on the types of pumps available see page 77.

See page 51

Eco Showers.

The Eco range offers the exceptional performance you expect of a Triton shower but with a focus on water efficiency. All options offer a suitable maximum flow rate whether you have a high or low pressure system. Available in an electric model or 2 stylish mixer variations these showers can almost halve water usage, when compared to a conventional mixer. So whether you have a water meter and are looking for a cost effective solution or are looking to the future and making a greener choice, you can make savings that really do add up.

The New Eco Range

Unichrome Dart Eco

Available in the same robust exposed or circular built-in designs as the standard Dart mixer showers, this Eco model has an integrated flow regulator to deliver a maximum flow rate of 9 litres per minute. Either unit is matched with an all chrome riser rail and 5 spray pattern showerhead.

Unichrome Dove Eco

Our ecological bar mixer is the same design as the standard Dove model but its sleek body houses a fixed flow regulator that cannot be altered delivering a maximum flow of 6 litres per minute. The chrome bar is complemented by an all chrome riser rail and 3 spray pattern showerhead.

T80Z Eco Electric

This unit offers a stylish solution for anyone looking for an electric shower with an ecologically responsible flow rate of below 6 litres per minute. The shower's neat white fascia is complemented with a white and chrome riser rail and a 5 spray pattern showerhead.

Unichrome Dart Eco
Code: ECODATHCM

Unichrome Dove Eco
Code: ECODOTHBM

T80Z Eco
White/Chrome
Code: ECO8008Z – 8.5kW

The table below shows the water savings allowed by the Triton Eco range when compared to a conventional mixer shower. Over the lifetime of a shower, this represents substantial water savings.

Shower type	Conventional mixer	Triton T80Z Eco	Triton Dove Eco	Triton Dart Eco
Litres per min	12	6	6	9
Total usage*	60	30	30	45

*(Per person per day) assuming one 5 minute shower

Bathroom Accessories.

Beautiful showers deserve beautiful surroundings. That's why Triton design and manufacture, with the same attention to detail, quality and style as our showers, a comprehensive range of fitments and accessories. On the following pages we have listed our complete range, everything from towel rails, to tumblers, to corner cabinets so you can complete the look. From the contemporary chic of the Eclipse and Thames ranges to the traditional elegance of the Avon collection, there's a choice to suit every preference and every pocket.

Pumps

With Triton’s range of booster pumps you can get the power performance you demand from your shower, turn any mixer into a power shower or simply boost your low pressure flow rate.

T40i Bath/shower mixer booster pump

The T40i booster pump offers a no-plumb solution to increase the flow of your shower or bath mixer. Simply connect to your existing mixer outlet with the supplied hose and the small, unobtrusive unit will instantly boost your flow rate.

T22i Twin impeller booster pump

Providing pressure of up to 2.2 bar, this booster pump is ideal for use in conjunction with Shower Towers and mixer showers.

T550i Twin impeller booster pump

The T550i is the unit to opt for if you want to convert a mixer shower into a high flow rate shower of up to 1.2 bar.

T450i Single impeller booster pump

If you are experiencing low pressure cold mains problems with your electric shower, this pump is the solution, boosting the supply from your cold water tank and in turn your flow rate.

Provides increased water pressure

Keeping it simple, keeping it running.

As well as making choosing our showers as straightforward as possible, we also offer a comprehensive service from pre-project planning to completion and beyond to make life a lot easier.

More availability, less delays

When you choose Triton you can trust our products to be readily available across the country through a nationwide network of around 3,500 outlets ensuring no delays on site.

Nationwide service engineers

Should you need it, we have a nationwide team of Customer Service Engineers to diagnose and solve problems on site. All with the reassurance of knowing that they have the skill and experience to remedy the situation in 99% of occasions.

All the help you need, all the way

Additional help is available through our experienced Technical Advisory Team who can guide you from planning through to installation. Support services are also provided to you by our team of National Specification Mangers. And linking all of this with our Technical Service Engineers in the field is the Triton Specification Advisory Service ensuring that you have expert help when you need it, where you need it.

The details you need

Customer Service:

A dedicated team of 40 Customer Service Operators are on hand to give you all the help and advice you need:
Tel: +44 (0) 844 980 0750
Email: serviceenquiries@tritonshowers.co.uk
Website: www.tritonshowers.co.uk

Installer Hotline:

For immediate technical advice on installation, product suitability or to request additional fitting instructions:
Tel: +44 (0) 844 980 0730
Email: technical@tritonshowers.co.uk
Website: www.tritoninstallers.co.uk

Spare Parts:

We aim to despatch all orders received by 4.30pm (Monday to Friday) on the same day:
Tel: +44 (0) 844 980 0750
Email: spare_parts@tritonshowers.co.uk

Water Entry Points	Side
Outlet Connection	15mm push fit
Minimum Head Pressure	150mm
Maximum Head Pressure	10m
Maximum Open Outlet Flowrate at 1.2 Bar	16l/min
Approvals, Complies with	BEAB, CE
Guarantee	1 year

T450i
single impeller pump

Voltage 230/240V AC.	Rating 73W nominal
Plumbing System Compatibility	Low pressure gravity
Inlet Connections	15mm push fit
Water Entry Points	Side
Outlet Connection	15mm push fit
Minimum Head Pressure	500mm
Maximum Head Pressure	10m
Maximum Open Outlet Flowrate at 1.2 Bar	15l/min
Approvals, Complies with	BEAB, CE
Guarantee	1 year

NENE

Description	Dimensions (mm) (H x W x D)	Code
Toilet roll holder	125 x 139 x 73	ANE001CP
Towel ring	213 x 170 x 74	ANE002CP
Frosted glass tumbler and holder	105 x 64 x 120	ANE005CP
Frosted glass soup dish and holder	90 x 130 x 134	ANE004CP
Glass shelf	83 x 498 x 112	ANE003CP
Single towel rail	54 x 527 x 81	ANE06CP
Single towel rail	54 x 678 x 81	ANE006CP
Frosted glass toilet brush and holder	415 x 107 x 162	ANE010CP
Robe hook	75 x 54 x 73	ANE009CP
Soup basket	80 x 148 x 134	ANE014CP
Frosted glass liquid soap dispenser	164 x 64 x 124	ANE015CP
Mirror	598 x 495 x 73	ANE013CP
Double towel rail	100 x 664 x 153	ANE246CP

THAMES

Toilet roll holder	45 x 166 x 71	ATH001CP
Towel ring	175 x 160 x 70	ATH002CP
Glass shelf	34 x 565 x 105	ATH003CP
Frosted glass tumbler and holder	95 x 125 x 110	ATH005CP
Frosted glass soap dish and holder	35 x 141 x 122	ATH004CP
Frosted glass toilet brush and holder	114 x 150 x 143	ATH010CP
Double robe hook	34 x 80 x 71	ATH012CP
Mirror	457 x 538 x 73	ATH013CP
Single towel rail	34 x 638 x 70	ATH246CP

ECLIPSE

Toilet roll holder	178 x 167 x 39	AECP9010
Towel ring	225 x 185 x 39	AECP9020
Double robe hook	100 x 67 x 51	AECP9120
Frosted glass tumbler and holder	43 x 166 x 81	AECP9030
Frosted glass soap dish and holder	72 x 198 x 102	AECP9040
Glass shelf	36 x 660 x 131	AECP9050
Soup basket	114 x 147 x 131	AECP9150
Single towel rail	36 x 580 x 78	AECP9130
Single towel rail	37 x 730 x 89	AECP9060
Frosted acrylic toilet brush and holder	408 x 110 x 149	AECP9070
Frosted glass liquid soap dispenser and holder	166 x 168 x 82	AECP9140

EDEN

Toilet roll holder	100 x 167 x 47	AED001CP
