

hansgrohe

Catalogue

With Hansgrohe, water becomes a pleasure. Since 1901, the source of this pleasure has been our superior quality and reliability. However, Hansgrohe showers and mixers stand not only for perfect technology and functionality, but also for products which contribute to a sense of well-being through their unique design – whether in the bathroom, in the shower or in the kitchen. Three attractive style worlds offer an abundance of choice, to fulfil all your desires. Whether it's Elegance, Style or Classic – you can be sure to find something that is just right for you. This catalogue provides an overview of the wide range of Hansgrohe products, but you may continue your journey of exploration at www.hansgrohe-int.com, and eventually in the comfort of your own home. Enjoy!

Hansgrohe. The Original. With more than 100 years of company history, we are committed to tradition. At Hansgrohe, this means constant development and always being ahead of the times. Continuous innovations from our think tank, which have set trends in the world of bathrooms and established worldwide standards, many design awards and numerous copies (which, however, never come close to the original) show that we are living up to our name. The best proof, however, is our many satisfied customers.

Shown above: Hans Grohe, 1955.
The company founder in his element.

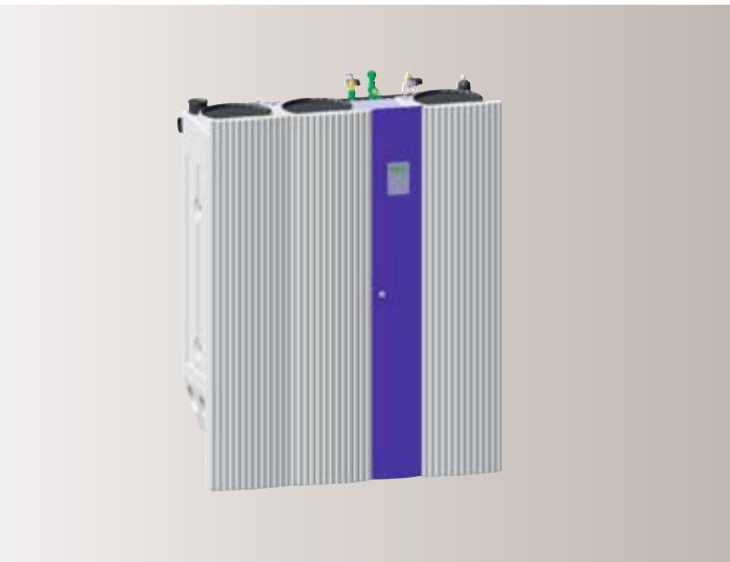

All signals are green: Ecology at Hansgrohe. Whether it's solar power or waste management, heat recovery or water recycling – long before others, Hansgrohe committed itself to the careful use of resources and to environmentally friendly products and production procedures. With its product innovations and many years of strict environmental management, Hansgrohe has contributed significantly to the protection of the environment. It is no accident that our company has won several awards for its exemplary ecological commitment. In the words of Klaus Grohe and Siegfried Gänßlen: "As one of the leaders in innovation, we have acted out of genuine conviction in this area."

Hansgrohe is a founding member of the German Society for Sustainable Building (DGNB) and a partner in the WaterSense program of the US Environmental Protection Agency (EPA).

www.hansgrohe.com/sustainability.

Innovations in shower and mixer technology. Designing products with exceptional durability, that are not only highly functional but a source of pleasure – this has always been our passion. From Selecta, the first adjustable hand shower to the first bath mixer with loop handle to the Raindance shower revolution, Hansgrohe has always had a sharp eye for innovation. For us, this means constantly advancing and striving for improvements. For you, it means always being able to find an innovative and satisfying solution to your needs at Hansgrohe.

From top left to bottom right:

1968: Selecta, the first adjustable hand shower. 2001: iBox universal, the revolution in concealed installation. 2001: Pontos AquaCycle, water recycling plant. 1981: Allegroh, the first bath mixer with loop-shaped handle.

Distinctively Hansgrohe. Our showers and mixers offer many useful functions and details that make daily use as easy and comfortable as possible – so that you can enjoy your Hansgrohe products for many years.

AirPower. More fun in the shower.
Greater Shower Fun through an invigorating mixture of air and water.

QuickClean. Anti-limescale function.
Easy cleaning for a perfect jet.

XXLPerformance. Size counts. Large-sized shower heads for the ultimate shower experience.

EcoSmart. Greater savings – greater enjoyment. Mixers and showers which save water and energy.

ComfortZone. Greater ease of operation. All functions can be controlled easily and comfortably.

Hansgrohe style recommendations. Your taste is as unique as your personality. We want to give you the opportunity to explore your distinctive style in the bathroom. With this in mind you can choose between Elegance, Style and Classic – three complete and independent style worlds to suit your individual taste, lifestyle and preferred bathroom ambiance.

Style

Space for yourself. You are the clear, analytical type. You have an aversion to ornaments and embellishments. You find your strength in tranquility and by focusing on the essentials. Your style is straightforward and minimalist, leaving space enough for you.

Elegance

Harmony through contrast. You are passionate about creative combinations. You love exciting contrasts and a modern mix of styles. You wish to create a warm and welcoming atmosphere which mirrors the many facets of your own personality.

Classic

The value of personality. You are a lover of classic style in matters of culture, cuisine and home furnishing. You love being surrounded by beautiful things which remind you of precious moments. You create a harmonious ambience by means of your intuition and personality.

Product overview

Mixers and Showers

A matching shower for every mixer. Exciting, stimulating and perfectly matched. With these characteristics, Hansgrohe mixers and showers enhance harmony in bathroom and shower. Whether it's Elegance, Style or Classic – the Hansgrohe World of Styles reflects the standards of modern bathrooms:

	Elegance	Style	Classic
Raindance			
Croma 100			
Crometta 85			

a perfect union of form and function, in line with your personal style and taste. Whichever style world you choose – Metris, Talis or Focus – with the Raindance Croma 100 or Crometta 85 showers you will always find the ideal match.

ELEGANCE

Harmony for the bathroom. Flowing lines, sweeping shapes – the Metris E mixer line creates a true connection to the element which dominates the bathroom – water. With the grace of a jet of water, Metris E brings natural beauty and elegance to your bathroom. The discretely rounded shape and flat handle exudes purity and harmony. Careful workmanship and sophisticated, long-lasting technology ensure the best functionality.

Single lever shower mixer

Talis[®] E²

Ease and harmony. The development of the Elegance design world was inspired by organic natural forms. Talis E² has delightfully harmonious curves, elegant edges and shiny surfaces. Just as in nature, the combination of flowing forms and high-quality surfaces provides exciting contrasts. With Talis E² you create an elegant, warm and welcoming bathroom which reflects your personality.

Single lever shower mixer

Freshness and vivacity. Focus E² plays with the contrast between soft shapes and clean, geometrical lines. The spout features a dynamic tilt, cleverly showing off its smooth surface. The combination of high-contrast design and sophisticated technology results in a tap that exudes superior quality and is equipped with the tried-and-tested QuickClean anti-limescale function. And Focus E² makes it clear that good taste need not be a question of money.

Single lever bath mixer

STYLE

Metris® S

The clarity. Simplicity rather than spectacle. Clarity rather than complexity. Timelessness rather than trends. In a world of over-extravagance, the bathroom becomes an oasis of calm and constancy, a place to pause and take stock. Metris S is a geometrical mixer series that supports your self-awareness. With its pin handle and geometric shapes, Metris S focuses completely on the essential. Yet despite all this reduction, its high-grade material and technical properties meet Hansgrohe's high quality standards.

Single lever bath mixer

Talis[®] S²

How can style be accentuated? Sometimes by simplicity. In the Style design, Talis becomes timeless, simple and geometrical. In this design, less means more. There is no unnecessary detail. Instead, simple, timeless, geometrical basic shapes prevail, unfettered by any fleeting fashion trends. The straight, elegant lines represent style and superior quality, while the downward-slanting spout exudes vitality. With Talis S², you can have a stylish, minimalist bathroom that affords you the space to express your own personality.

Single lever bath mixer

When thinking about saving, most people think about reducing expenses. When Hansgrohe designed the Focus S mixer line, reduction meant eliminating unnecessary details. The result: a mixer line as pure and clear as the water it delivers, yet still equipped with high-quality, long-lasting Hansgrohe technology. Because we reduce costs in production, without compromising on function, Focus S is now also available with QuickClean – at an astonishingly low price.

Single lever shower mixer

CLASSIC

Metris® Classic

Modern, classic style. Metris Classic is inspired by classic shapes from the past and incorporates them into modern mixers. The handle and spout are subtly curved while the chrome surface accentuates the superior quality of the mixer. With its air of ease and vitality, Metris Classic exudes a sense of luxury. It also shines with its inner values, such as the QuickClean anti-limescale function and the water-saving EcoSmart function.

Single lever basin mixer

Talis® Classic

Classic beauty. With their subtle curves and classic features, the Talis Classic basin mixers live up to their name, bringing classic elegance into the bathroom. Whether it be a spout with an elegant, pleasing shape or an open, spacious channel – enjoy a unique water and design experience.

Single lever basin mixer
Natural

Accessories

Love of detail. Design is often described as art that makes itself useful. The character of every Hansgrohe shower and mixer is also expressed in a wealth of accessories, which bring you bathroom perfection. From towel holder to toothbrush tumbler, everything is matched with the different Hansgrohe style worlds – with meticulous attention to detail. Simply choose the accessories you desire.

Liquid soap dispenser

Toothbrush tumbler

Thermostat

Elegance

Exposed and concealed thermostats. Hansgrohe thermostats have it all. The highly innovative cartridge technology provides reliable scald protection and optimal pressure compensation. The Safety Stop function prevents the accidental choice of temperatures higher than 38 °C. The Safety Function provides the integrated scald protection: the maximum temperature can be set in advance, with infinite possible variations. The water saving Ecostop function reduces water consumption by up to 50 %. If you want more, you can simply press the Ecostop button and turn the water on full volume.

Shower thermostat
Ecostat® E

Style

Today, sophisticated technology requires less and less space. Thanks to technical advances, the new thermostat cartridges are highly efficient, yet compact – leaving more space for design. With a diameter of just 38 mm, the new Hansgrohe mixers are slim and delicate in appearance. You can now choose a thermostat that suits your preference and perfectly matches your overall bathroom design: Ecostat E for Elegance and Ecostat S for Style.

Bath thermostat
Ecostat® S

Mixer technology

Superior ergonomics and safe operation. We at Hansgrohe do everything in our power to develop and produce mixers which you can enjoy in your bathroom for a long time to come. All products made by Hansgrohe have to meet the strictest quality criteria and controls. In addition, our products are

Showers

Installation technology

Product overview

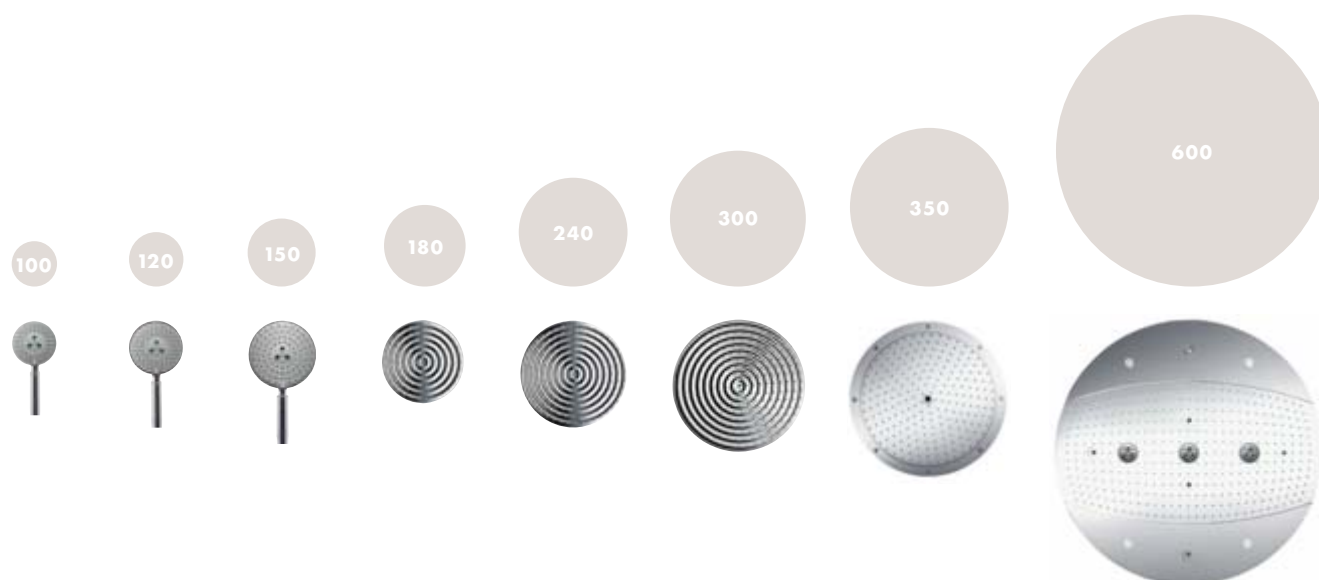

Raindance®

Bigger simply is better. With Raindance we have reinvented showering. This innovative shower technology has become ever more popular. What makes it so attractive is a large spray plate releasing a wide shower of rain. Your body is fully enveloped by water – without increasing water consumption. Shower Fun XXL – hand showers and overhead showers with a diameter from 100 to 600 mm.

Powered by AIR, the brilliant Hansgrohe shower technology. The water is infused with air and released in soft, voluminous drops which transform your shower into a veritable downpour. You can easily alternate between a warm summer rain and a powerful massage jet. Thanks to AIR, the water is distributed more efficiently, which means that a large shower consumes the same amount of water as a conventional model.

The right style for everyone. To suit your personal taste, the Raindance showers are offered in three different style worlds: “E” as in Elegance, “S” as in Style and “C” as in Classic. Each of these style worlds has its own perfectly matched mixers and accessories.

EcoSmart. Greater savings – greater
enjoyment. Showers which save water
and energy, thanks to their innovative
technology.

Innovative Hansgrohe shower technology. At Hansgrohe, we draw on the superior expertise of our research department and the experience gained over many decades. We study water day by day, drop by drop – and have done so for more than 100 years. The results are evident in innovations such as AirPower, where

water infused with air becomes a gentle rain shower or a powerful massage jet. Another innovation is QuickClean: thanks to the silicone jets, any limescale deposits can be simply rubbed away – for long-lasting shower enjoyment.

A wealth of options. Raindance is the embodiment of a lush, heavenly rain shower and is available in three different sizes – 100, 120 and 150 mm. We offer three different style worlds to suit your personal taste. Choose your hand shower in E as in Elegance, S as in Style or C as in Classic. Together with a matching shower bar, you can enjoy pure Shower Fun.

some side showers? With its exceptionally slim and subtle design, the Raindance Showerpanel for concealed installation blends perfectly into any bathroom. With the model for exposed installation, you can easily upgrade your bathroom for Shower Fun XXL.

All good comes from above. A heavenly rain shower, pouring straight down onto your head and shoulders. The Raindance AIR plate overhead showers wrap your entire body in a pleasant, warm cloak of water. Whether you choose S as in Style for a super-slim design or C as in Classic for a more elaborate appearance – Hansgrohe rain showers turn every shower into a unique experience. They are available in a diameter of 180 to 300 mm. A truly royal feast of water is offered by the Raindance AIR Royale, made from solid metal and crafted to perfection by expert hands. A shower of extraordinary class – with a spectacular diameter of 350 mm.

Showerpipes

Shower Fun XXL for every bathroom. Because the enjoyment increases with the size of the shower, the large overhead shower has set a new trend in the bathroom world. The Hansgrohe Showerpipes make it possible to introduce overhead showers into any bathroom. This has never been easier: the Hansgrohe Showerpipe combines all of the individual elements such as overhead shower, hand shower, shower bar and mixer to a harmonious, visually appealing product which is also easy and quick to install. Hansgrohe Showerpipes therefore make it easy to upgrade any bathroom for more Shower Fun.

Raindance Showerpipe
with single lever mixer

An upgrade for your bath tub. The new Raindance Showerpipe for the bath tub makes it possible to add a large overhead shower to your bath. Only a few quick and easy steps are required to replace your old shower with the new one. Depending on the bathroom layout, the Showerpipe can be installed either at the wide or narrow end of the bath tub. The shower arm is available in two different lengths, to facilitate the ideal positioning of the overhead shower – for Shower Fun XXL in any bath tub.

XXL
240

Raindance Showerpipe
Bath tub

The fastest way to a large overhead shower. Amazingly simple, requires no renovation work, fits into any shower or bath tub. Simply remove your old hand shower and screw the Raindance Connect Showerpipe into the wall. With one simple click, the hand shower becomes an overhead shower! The water pours down directly from above to envelope your head and shoulders. Raindance Connect fits into any bathroom and can be used wherever a hand shower is already installed. Its clean, minimalist design makes it a stunning centerpiece to your bathroom. When are you going to get connected?

Compatible with
any existing shower
connection

Rain Connector. Simply brilliant. Plug the hand shower into the Rain Connector to activate the overhead shower. The water is automatically directed through the shower bar – no need for a diverter.

Showerpipe design – an evolution. Less is often more. This is especially true for the Showerpipe. Its design is minimalist and exciting at the same time. It offers the ultimate in pleasure and genuine relaxation. The overhead shower and the water-conducting shower bar seamlessly blend into the concealed thermostat. Unique Shower Fun presents itself in an appealingly minimalist design. How is this possible? By means of the innovative iBox universal technology from Hansgrohe.

Raindance Showerpipe
Concealed installation with iBox universal

Experience the natural power of water. Raindance® Rainfall®. The Rainfall is a special experience – in so many respects. As the first horizontal rain panel, it demands attention with its innovative look. Installed flush with the wall, it projects far into the room. Experience an entirely new shower sensation and enjoy the space to move around freely – in all three spray modes. The 240 mm overhead shower with AIR function lets you experience an abundant rain shower, the Whirl function gives you a powerful massage with several jets while the unique broad flood jet places you under a lush waterfall.

The matching Hansgrohe mixers make the shower highly comfortable to operate: the volume of water and the spray modes can be easily adjusted by the controls.

Rain AIR. The 240 mm overhead shower with AIR function creates voluminous rain drops.

Whirl. The massage jets will not tilt forward until the water is switched on.

Rainflow. With warm water, the flood jet becomes a unique feast for the senses.

Showering in new dimensions: Raindance® Rainmaker®. The multifunctional Rainmaker lets you experience a truly natural phenomenon: water, air and a remarkably generous sense of space. Discreet in design, despite its size, and installed flush to the ceiling, the Rainmaker becomes an attractive architectural statement. With an incredible diameter of 600 mm, the Rainmaker creates the sensation of standing in the warm rain under open skies. Shower Fun XXL, under either the 300 mm shower spray or using the entire 600 mm width. The Rainmaker is available in either a round or square format. As an extra highlight, upon request, both models can be equipped with atmospheric lighting.

New: as an option, the Rainmaker is also available with iControl mobile. This innovative radio sensor system allows you to operate all spray modes and the lighting at the touch of a button. The unit operates without a battery and can easily be detached, allowing control of the water from outside the shower. The perfect warm-up effect for a pleasant start to the day.

EcoSmart

EcoSmart System. The integrated flow limiter keeps the flow rate at a constant 9.5 l/min, regardless of the water pressure.

Technology which helps save water. Thanks to the EcoSmart technology you can save water without sacrificing shower performance. The sophisticated flow limiter, special spray jets and the infusion of air work together to cut water consumption by up to 60 %. This not only saves water, but also energy, since less water needs to be heated. In all Hansgrohe mixers, EcoSmart mixes water with air to reduce the water consumption by up to 50 % down to a maximum of 7.2 l/min.

Pontos

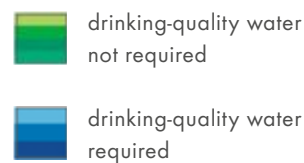

Pontos AquaCycle. Water – too precious to be used only once.

Water is our most important life-giving resource. In the bathroom and in the shower it refreshes and invigorates us. It is a unique element which touches all of us. It covers nearly three quarters of the Earth's surface, yet barely three percent of our total water resources are fresh water. This is why for Pontos AquaCycle every single drop counts. Since 2001, this name has been synonymous with biological water recycling. The first steps towards biological water recycling were taken at Hansgrohe back in 1994. We began implementing this concept in 1997 and it has since been developed into a sophisticated, reliable system: Pontos AquaCycle.

How much drinking water do we really need? Water is too valuable to be wasted. As the following chart shows, we don't require drinking-quality water for every water-dependent activity.

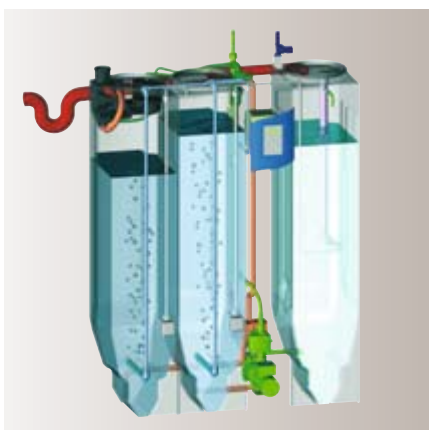

The average per-capita water consumption in Germany is 129 litres per day.

It's smart to use water twice. Pontos AquaCycle turns the water from the shower and bath into clear water which, in fact, even complies with the EU standard for bathing waters. This hygienically clean water can then be reused for flushing the toilet, running the washing machine, cleaning or garden irrigation. The system makes use of the microorganisms contained in the water to decompose substances such as soap or shampoo. All this is done without the addition of chemicals or other biological agents. Pontos AquaCycle makes a considerable contribution to sustainable living. Depending on its application, this system makes it possible to reduce water consumption – and therefore also the cost of water – by up to 50 percent.

Innovative and clean. Pontos Aqua Cycle makes use of the microorganisms contained in the water. The water is cleaned using a biological-mechanical process, without the use of additives.

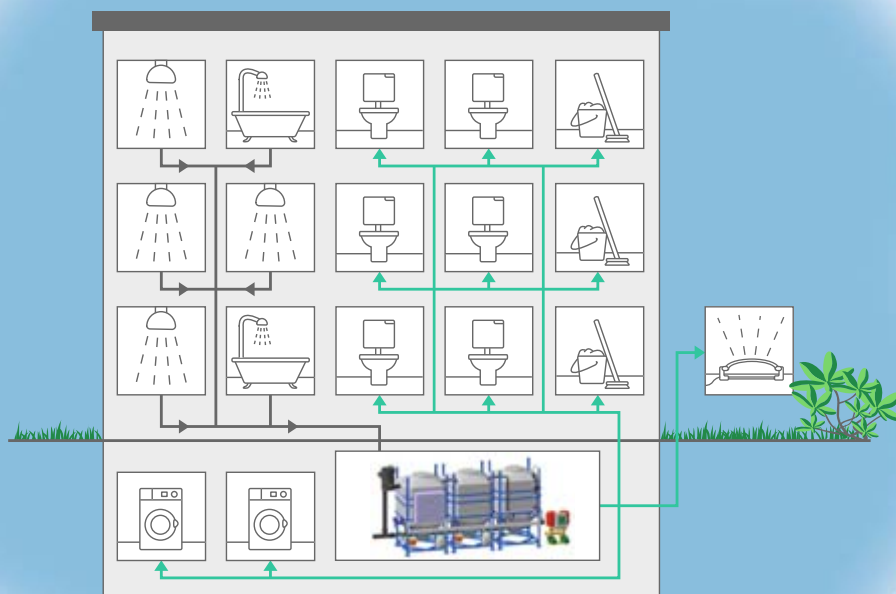

Space-saving and low maintenance. Pontos AquaCycle is guaranteed to operate reliably. It cleans itself almost entirely automatically and fits into any basement.

Flexibly adaptable. The plants can be designed for daily water consumption of up to 30,000 litres. The Pontos AquaCycle 900 shown below has a recycling potential of 600l/day.

Installation technology

Water the way you like it

Mixers

Showers

Installation technology

Product overview

Ease of operation

Exposed mixer – for 1 shower. For example: Metris S shower mixer for exposed installation with single lever mixer, for manual operation. Flow rate and temperature are both set manually.

Exposed thermostat – for 1 shower. A thermostat is the more comfortable version of an exposed mixer. The temperature can be set to a precise degree, and the water is mixed quickly and automatically.

Concealed thermostat – for 2 showers. In a concealed installation, the mixer body is set into the wall. In this case, two different shower types can be operated. This solution offers a clean appearance and greater comfort in the bathroom.

What do you like best? Depending on your preferences regarding design, shower outlets, and ease of operation, you can select from a variety of different mixers. Exposed controls are mounted directly onto the wall. Here you have the choice between a manual single lever mixer and a comfortable thermostatic mixer. In a concealed installation, the thermostat body is built into the wall. Since the only visible parts are the operating lever and a discreet wall plate, a minimalist design effect is achieved – with significantly increased freedom of movement. The more diverse the shower functions, the more complex becomes the piping behind the wall. No matter which shower family you choose, Hansgrohe has a solution for everyone – from a simple exposed mixer to an electronic remote controlled shower.

Concealed thermostat – for 3 showers. Based on the iBox universal, iControl operates in conjunction with a concealed thermostat. Three different showers can be turned on and off by means of a single control element.

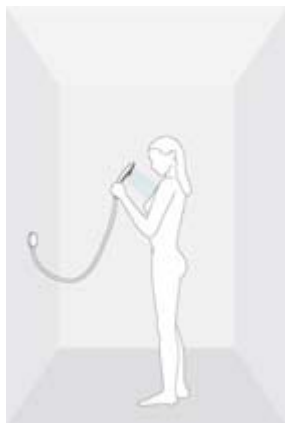

Concealed thermostat – for 3 showers, electronic. iControl mobile is based on the iBox universal and delivers digital technology to the bathroom. Its unique feature, the control element, can be detached and operated like a remote control. In this way, the shower can be started comfortably from outside – so that when entering the shower the water will have already reached the desired temperature.

RainBrain – an electronic system for controlling up to five different showers. With the RainBrain touchscreen, showering is a pure pleasure. All shower functions can be easily controlled with a light touch of the finger: everything from the choice of shower and spray mode to lighting and steam – even your music, which can be transferred directly from your iPod.

Shower options

Raindance Hand shower
Equipped with different spray modes and AIR technology, the Raindance hand showers are ideal for fitness, wellness and beauty applications.

Raindance Shower set
Adjustable along the whole length of the body, the Raindance can be used as an overhead, shoulder, hand or side shower. It is quick and easy to install on the wall.

Raindance Body showers
If the large body showers are pointed in the desired direction, invigorating jets of water touch your body from several angles, on all sides. They are installed on the wall.

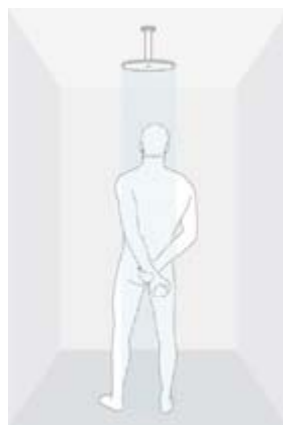

Raindance Showerpanel
Water from many showers: from the Raindance hand shower as well as from powerful body showers. The panel is installed on the wall and can be added to your existing bathroom at any time.

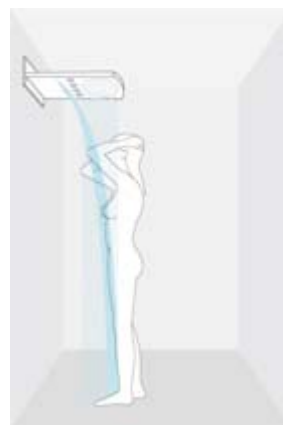

Raindance Showerpipe

For generous shower rain directly from above in combination with a thermostat on the wall. This can be simply added to your existing bathroom – the quickest way to include a large overhead shower.

Raindance Overhead shower

The large plate overhead shower provides a soft rain shower, completely enveloping the body. Can be installed either on the ceiling or with an arm fixed to the wall.

Raindance Rainfall

The horizontal rain panel pampers you with a large overhead shower, massage jets and a broad, luxurious flood jet.

Raindance Rainmaker

This overhead shower system is installed into the ceiling and promises especially wide shower rain from above. The large size makes it suitable for two people. Available with optional lighting.

How do you like your shower best? Set up your personal shower area at <http://showerguide.hansgrohe.com/>

iBox® universal

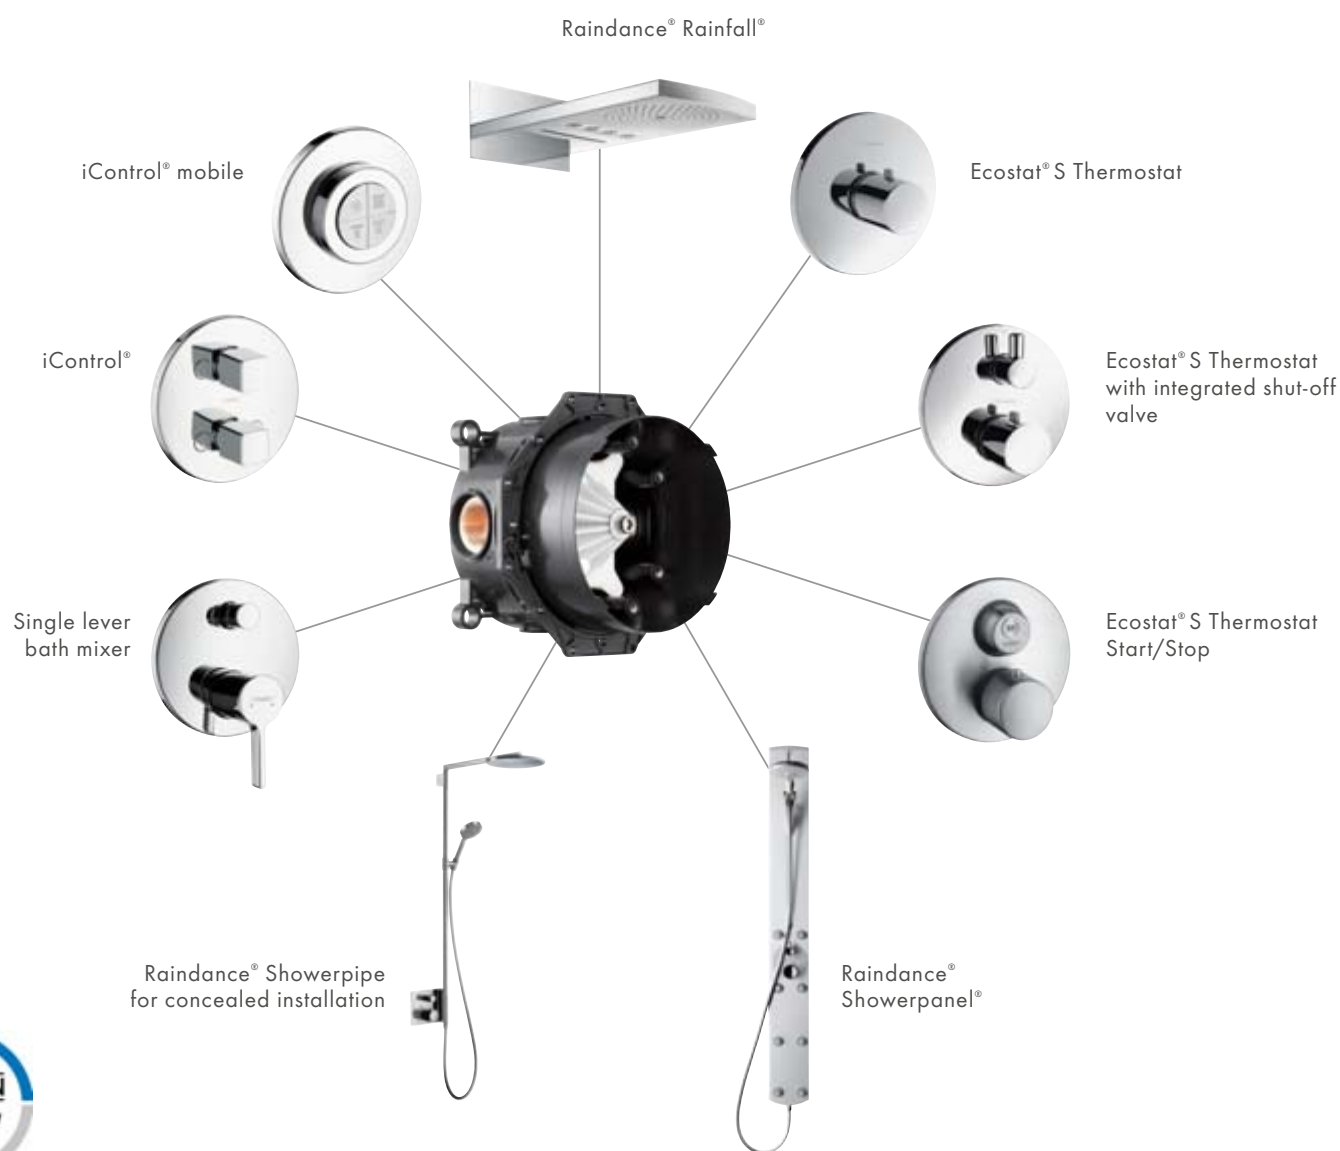

iBox® universal basic set
Brass with low zinc content
#01800180

Hansgrohe® iBox® universal – now offering an even greater variety of options.

Compatible with all Axor and Hansgrohe mixer lines, the latest version of the iBox universal is equipped with an adjustment ring for greater flexibility. It now offers an even greater range of options for your bathroom: the Raindance Rainfall and the Raindance Showerpipe are both installed using the iBox universal. Enjoy the luxury of a concealed installation: greater scope for movement in both bath tub and shower and the freedom of waiting to choose your mixers until the final installation stage. Choose your finish sets according to your personal style: Elegance, Style or Classic – you will be sure to find the right mixers. Experience the advantages of this revolution in concealed installation.

iBox® universal combinations

iBox® universal technology

Installation with rotational symmetry. The symmetrical construction of the iBox universal makes all connections simple. It is important that the cold water is on the right simple the hot water is connected opposite to it. When using a shower mixer the top or bottom connection point can be used.

Safe and economical. The universal basic set comprises the connection block only. The valuable finish set is supplied later, when it is fitted. This makes expensive warehousing unnecessary and prevents problems like theft, dirt or frost damage occurring during the building phase.

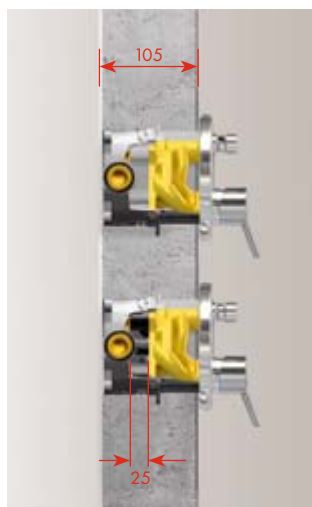

A variety of installation possibilities. Co-ordinated with all current installation systems and connecting variations and fittings, the iBox universal is truly universal. With a flexible adjustment ring, fitting alternatives on two levels with 3/4" connections is possible.

All included. Concealed single lever bath mixer with integrated backflow preventer for spout, overflow and waste system (Exafill). Hansgrohe's universal integrated safety system means it is not necessary to use an additional backflow preventer, which reduces installation costs and maintenance expenses.

Completely sealed. Rubber seals on all four connection points and a splash-resistant sealing collar keep the brickwork dry on all sides.

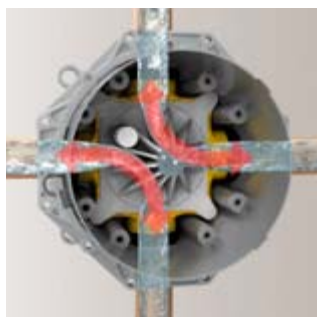

Basic set extension. Hansgrohe has a solution, even for a situation where the iBox universal has been fitted too deep into the wall. Then the basic unit extension is fitted between the connector and the function block. The extension set ensures safety right up to the wall, in this case preventing damp walls.

Soundproof. The brass body of the iBox universal rests on seals to prevent the noise from water passing through the wall. The screwed joint is between the collar and housing of the iBox universal, but not the function block, which prevents sound from travelling through to the tile.

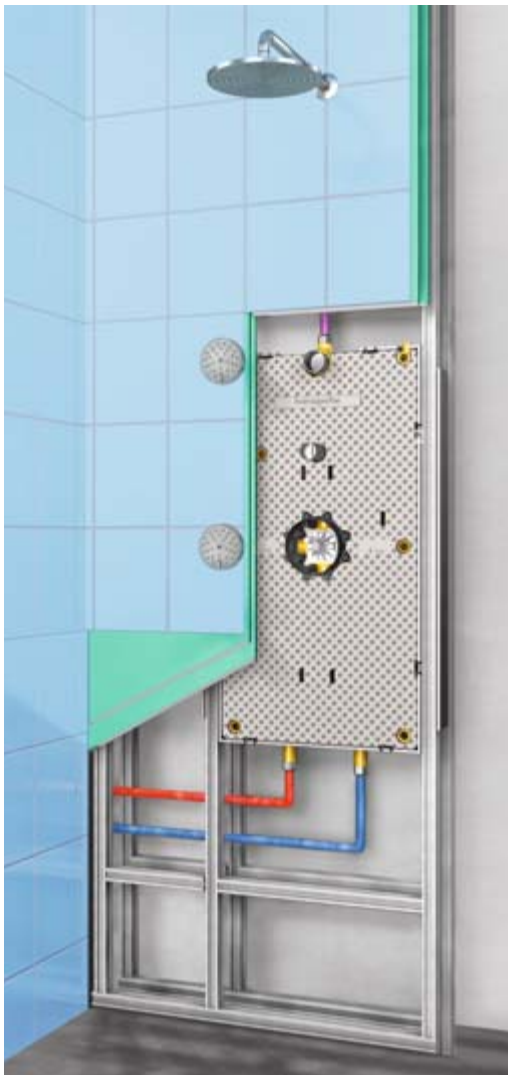

iBox® universal collar extension. Thanks to the extension, more shallow installation depths are no longer a problem. The extension, more shallow collar is fitted between tiles and finish set, making it possible to fit the iBox universal, despite the lack of depth.

Simplified rinse out. The supplied rinse block, which can be fitted in various positions, makes it possible to rinse pipes right through, according to DIN 1988.

Hansgrohe® iModul® – a simple route to a Shower Family. Completely pre-assembled and ready for use, the iModul is the ideal basis for concealed installation of the hand shower, up to six body showers and one overhead shower. Whether on, or in the wall, or in an installation mounted on the wall – all you have to do with the iModul is to connect hot and cold water. Then just mount the iBox universal's thermostat ready-to-use unit into the chosen shower family, and your high-quality personalised shower cabin is ready – all with a minimum of installation work!

Completely pre-assembled and ready for use, the iModul keeps the installation process to a minimum. Whether on top of or inside the wall, or in a wall-mounted installation – all you have to do before tiling is connect the hot and cold water. The chosen mixers and showers are then installed and your personalised shower cabin is ready for use.

Bath fillers and waste systems

Exafill® S. The new combined bath filler, waste and overflow system with integrated flood jet is ultra-slim and ultra-practical. It stands out in terms of both design and functionality. Equipped with the QuickClean function, it combines exceptional ease of use with a simplified installation process.

Flexaplus® and Flexaplus® S.

Simple design, convincing technology. The Flexaplus waste and overflow system makes it possible to raise the water level in the tub by up to 25 mm. During installation, its overflow regulating element is simply placed into the finish set in the desired position. This guarantees pure bathing pleasure – even in the smallest bath tub.

Flexaplus® S. The overflow regulating element can be adjusted to meet your individual needs. This technology makes it possible to raise the water level in the tub by up to 25 mm.

Raindrain® 90 XXL. Perfect for large showers with a high flow rate – like the Rainmaker. With a drain capacity of up to 51 l/min, Raindrain easily copes with large amounts of water. Despite its complex internal technology, the system is easy to install, and of course, also easy to clean.

Flowstar® and Push-Open.

Minimalist design meets superior functionality. Flowstar creates visual harmony below the water basin, and the push-open basin valve ensures ease of operation. With a simple touch the valve is easily closed and opened again.

Push-Open Basin valve.

One push with the finger is enough, and the valve is easily closed and opened again.
