PLUMBA THREAD **Pipe Thread Sealer**

Geocel® Plumba Thread is a non-setting adhesive designed for locking and sealing pipe threads. It replaces PTFE tape and dopes and gives an instant low pressure watertight seal which allows systems to be started up without delay. Because Plumba Thread is non-setting, it enables the joints to be easily dismantled for repair or replacement in the future.

Main Uses

The liquid alternative to PTFE.

Benefits:

- Easy and quick to use
- Non-setting, allows joints to be dismantled easily
- WFBS approved

Pack Size 50g 'e' Tubes = 22 rolls (5m x 12mm) PTFE tape
