CARE & MAINTENANCE

Care

To maintain the surface finish, simply wipe occasionally with a mild detergent on a soft damp cloth. Dry, using a soft cloth. Never use abrasive cleaners or chemical household cleaners and avoid contact with concentrated bleach.

Maintenance

No regular maintenance is required for this product.

In case of complete replacement Pegler recommend service valves should be fitted to the supply inlets.

For any further help or replacement parts please contact the Service Support Team on 0800 1560050.

GUARANTEE

Luxury Taps and Mixers

Pegler Yorkshire Customcare 10 Year Guarantee - Terms and Conditions

Product are subject to a 10 year guarantee that is between Pegler Yorkshire and the final purchaser of the product.

The guarantee is subject to proof of purchase being supplied.

This guarantee does not affect any statutory rights the consumer may have in law.

The guarantee covers manufacturing or material defects and does not cover parts subject to normal wear and tear.

Finishes other than chrome are covered for a period of 3 years only and the guarantee on the finish is subject to the cleaning instructions being followed.

The guarantee is not applicable where the product is fitted contrary to the conditions in the fitting instructions.

Abusive behaviour and accidental damage to the product are not covered by this guarantee.

The extent of this liability is limited to the cost of the replacement of the defective item and not to fitting or consequential damages.

BEFORE STARTING

Thoroughly flush pipework.

It is our recommendation and good plumbing practice that water supplies to the mixers should have equal pressure.

It is necessary to fit these products in accordance with WRAS water supply (water fittings) 1999 & water bylaws 2000 (Scotland).

PRE INSTALLATION CHECKS

1. Ensure that there is sufficient space to install the product without hampering its operation.

When fitting in a corner position making sure there is sufficient clearance for use of the handles.

2. Ensure that the outlet will protrude sufficiently into the tank and will clear any obstructions.

OPERATING PRESSURES

0.1 bar min to 10.0 bar max

In domestic premises it is permissible to install the mixers on unbalanced pressures (separate sources) provided that single check valves are fitted immediately upstream of both hot and cold inlets.

However, it is our recommendation and good plumbing practice that the hot and cold supply pressures to the mixer be equal (balanced) to ensure the temperature of the mixed water remains stable in the event of draw offs being experienced at other points.

REMOVING YOUR OLD TAPS

1. Make sure the water supply to your taps is switched off.

2. Turn on the taps to drain the pipework.

3. Unscrew the nuts which connect the taps to pipework and remove the taps.

FITTING YOUR NEW TAPS

1. Place washer on base of body, screw in threaded stud, screw in both copper tails. Place fitting through hole in ware. Place rubber and clamping plate over threaded stud, then screw the retaining nut onto the nut and tighten firmly.
2. Install check valves if required.
3. Connect tap to water supply.

CARE AND MAINTENANCE

To maintain the surface simply wipe occasionally with a non abrasive detergent on a soft damp cloth and dry using a soft cloth. Never use abrasive household cleaners or chemical products. Avoid contact with concentrated bleach.

Pegler products are manufactured to the highest standards and should require little or no maintenance. In the unlikely event of any spare part requirements, please contact your nearest stockist or Pegler Limited, St Catherine's Avenue, Doncaster, South Yorkshire. DN4 8DF
