

SHOWERS

When you want to get hot but not bothered, a Roper Rhodes shower is the perfect place.

We start off with functionality, making sure all controls are easy to handle and operate exactly as they should. Then we let our designers loose to create the spectacular, the contemporary and the traditional with a twist. And all the while we bear in mind that you want a comprehensive range, giving you the option of kits or mix and match. Simply choose the design and type of shower valve perfect for you, then opt for one of our shower kits, or alternatively design your own shower experience, using our great range of fixed heads, handsets and accessories.

So turn on, tune in, without splashing out.

SAFETY & TECHNICAL INFORMATION

All Roper Rhodes shower valves have been tested to the most rigorous safety standards.

TMV2 – the safe choice

TMV stands for thermostatic mixing valves which are a safeguard against accidental scalding. TMV2 is the standard for domestic use. You can be assured that your Roper Rhodes valve has been engineered to the highest manufacturing standards, as all of our valves have been certified by the TMV2 scheme for domestic showers or tested to an equivalent standard. Extensive mechanical testing is carried out independently by Build Cert, a Notified Certification Body, who test for compliance with the TMV scheme.

Scald prevention

Sudden changes in hot or cold water supply can lead to injury through scalding or shock. The patented thermostatic cartridge within all Roper Rhodes valves maintains the selected temperature during showering so that with a sudden loss of either the hot or cold water pressure the shower valve will automatically shut down, therefore reducing the risk of injury.

Thermostatic showering

All Roper Rhodes shower valves are thermostatic, allowing you to set and maintain your chosen maximum temperature.

Accurate temperature control

Showering with water that is too hot can cause scalding. To ensure the temperature of the water is maintained at a safe level the thermostatic cartridge continuously monitors and adjusts the mixed water temperature to within 1.5°C, ensuring a comfortable and safe showering experience.

Maximum temperature

To guarantee that the valve temperature cannot exceed the safe temperature of 44°C, the temperature control is fitted with a safety stop mechanism.

Endurance

All shower valves are put through the most rigorous testing procedure to ensure you can enjoy continuous showering for years to come. Such is our confidence in the quality of our showers that we offer a 10 year guarantee when you purchase these products.

Suitability

Our showers are suitable for use with all plumbing systems.

Shower operating pressures

We recommend 0.1 bar up to 5 bar with concealed inline valves, and up to 4 bar with concealed and exposed valves. A minimum of 0.5 bar is recommended with the triple inline valve.

Chrome plating

Repeated and extensive polishing operations followed by the highest standards in chrome plating ensure that our showers will stay looking good for many years to come.

WRAS approval

All of our showers* are WRAS approved in accordance with the Water Regulations Advisory Scheme. The approvals process requires that all showers use safe materials.

Customer hotline

Should you require any further information or technical assistance on our range of showers, please call our customer service hotline on 01225 303 900.

All Roper Rhodes showers are supplied with full installation instructions.

PRODUCT

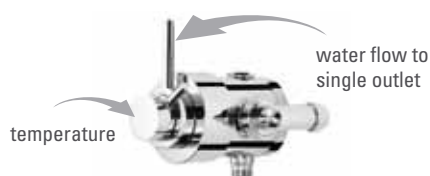

HOW TO SELECT THE VALVE THAT'S RIGHT FOR YOU

There are seven basic formats of valve available, each with different installation requirements and features. Use this guide to choose the valve that's right for you.

Concealed two way diverter valve

- Mounted within wall for concealed installation
- Temperature and flow controlled independently
- For control of two separate shower accessories – for example shower head and shower handset
- See page 138

Exposed dual control valve

- Surface mounted installation
- Simplified installation process
- Temperature and flow controlled independently
- Use with rigid riser rail or shower kit; no need for a wall elbow

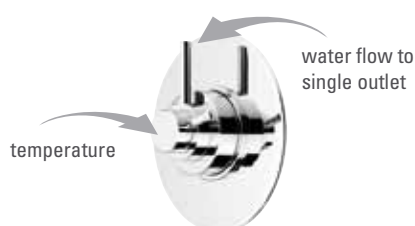

Exposed top outlet bar valve

- Surface mounted installation; includes easy fit fixing kit
- Simplified installation process
- Temperature and flow controlled independently
- Use with rigid riser diverter rail for control of two separate shower accessories

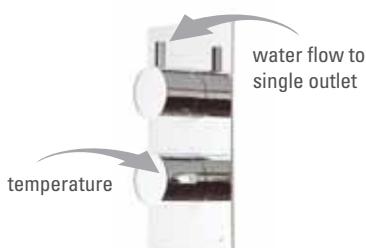

Exposed bottom outlet bar valve

- Surface mounted installation; includes easy fit fixing kit
- Simplified installation process
- Temperature and flow controlled independently
- Use with shower kit

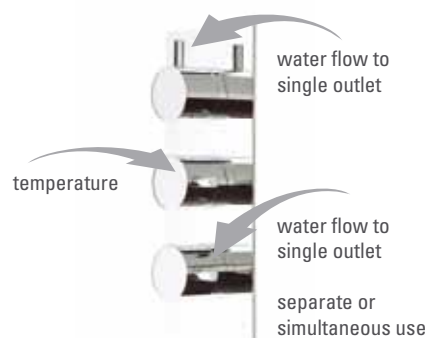

Concealed dual control valve

- Mounted within wall for concealed installation
- Temperature and flow controlled independently
- Use with fixed head on its own, or add a wall elbow to use with a shower kit

Concealed dual inline valve

- Mounted within wall for concealed installation
- Temperature and flow controlled independently
- Use with fixed head on its own, or add a wall elbow to use with a shower kit

Concealed triple inline valve

- Mounted within wall for concealed installation
- Temperature and flow controlled independently
- For the ultimate shower experience
- Two independent flow controls which can be used separately or simultaneously
- For control of two separate shower accessories – for example shower head and shower handset
- We recommend a minimum pressure of 0.5 bar for the triple inline valve

Factor bottom outlet bar valve shown complete
with Spring shower kit and wall outlet

FACTOR

Cool, angular styling.

The simplest of shapes makes for a stunningly modern shower room.

- Suitable for all plumbing systems
- TMV2 approved – see page 120 for details
- Easy to use separate flow and temperature control
- Available in four formats as shown. See page 121 to find out which valve is right for you
- Triple inline valve includes a secondary outlet for use with additional shower heads. We recommend a minimum 0.5 bar pressure
- Automatic shut down if pressure should suddenly fail, ensuring complete safety
- Precise thermostatic control, maintaining selected temperature to within +/- 1.5°C
- Resistant to lime scale build up
- 10 year guarantee

1. Concealed inline dual control shower valve SV1304 £317.52

2. Concealed inline triple control shower valve SV1305 £393.12

3. Top outlet bar shower valve SV1307 £170.08

4. Bottom outlet bar shower valve SV1308 £170.08

5. Easy fit fixing kit
Factor bar valves are supplied with a surface mounted fixing kit for quick and easy installation

SHOWER SYSTEMS

One stop, shower shop.

We've made life a little simpler by introducing these shower systems incorporating our best selling shower formats in easy to purchase packages. Whether you're looking for a single or dual function system there is a solution for you, and if it's great value you're after look no further than Shower System 10.

1. Shower System 1

SVSET01 £348.29

Includes Event two way diverter shower valve,
Round 220mm shower head, Adjustable fixed arm,
Wave slide rail, shower hose, Round single function
handset and wall elbow
Min. pressure 0.5 bar

2. Shower System 2

SVSET02 £344.11

Includes Storm top outlet bar shower valve, Height
adjustable rigid riser rail with diverter, shower hose
and Round 220mm shower head and Round single
function handset
Min. pressure 1.0 bar

3. Shower System 3

SVSET03 £401.71

Includes Storm top outlet bar shower valve, Height
adjustable rigid riser rail with diverter, shower hose
and Round 200mm shower head (brass) and Round
dual function handset
Min. pressure 1.0 bar

4. Shower System 4

SVSET04 £258.65

Includes Storm bottom outlet bar shower valve,
Sanctuary slide rail, shower hose and Round five
function handset
Min. pressure 0.5 bar

5. Shower System 5

SVSET05 £253.51

Includes Storm bottom outlet bar shower valve,
Sanctuary slide rail, shower hose and Round dual
function handset
Min. pressure 0.5 bar

6. Shower System 6

SVSET06 £223.82

Includes Storm bottom outlet bar shower valve,
Wave slide rail, shower hose and Round single
function handset
Min. pressure 0.2 bar

7. Shower System 7

SVSET07 £422.16

Includes Factor top outlet bar shower valve,
Adjustable rigid riser rail with diverter, shower hose
and Square 200mm shower head (brass) and Square
single function handset
Min. pressure 1.0 bar

8. Shower System 8

SVSET08 £309.07

Includes Factor bottom outlet bar shower valve,
Square riser rail (brass), shower hose and Square
dual function handset
Min. pressure 0.5 bar

9. Shower System 9

SVSET09 £245.52

Includes Factor bottom outlet bar shower valve,
Square riser rail (brass), shower hose and Square
single function handset
Min. pressure 0.2 bar

10. Shower System 10

TR3001 £155.23

Includes Vector dual control shower valve,
riser rail, shower hose, wall elbow and single
function handset
Min. pressure 0.1 bar

Shower System 10

SHOWER KITS

Choose from our range of eight complete kits with combined handset, rail and hose.

Then personalise your shower with a Roper Rhodes valve.

1. Wave single function shower kit

SVKIT01 £65.60

Includes Wave slide rail, shower hose and Wave single function handset

This shower kit is ideal for low pressure

Min. pressure 0.1 bar

Excludes wall elbow

2. Sanctuary triple function shower kit

SVKIT02 £105.24

Includes Sanctuary slide rail, shower hose and Sanctuary triple function handset

Min. operating pressure 0.5 bar

Excludes wall elbow

3. Spa five function shower kit

SVKIT03 £96.14

Includes Sanctuary slide rail, shower hose and Round five function handset

Min. operating pressure 0.5 bar

Excludes wall elbow

4. River dual function shower kit

SVKIT04 £91.01

Includes Sanctuary slide rail, shower hose and Round dual function handset

Min. operating pressure 0.5 bar

Excludes wall elbow

5. Crest single function shower kit

SVKIT05 £61.32

Includes Wave slide rail, shower hose and Round single function handset

This shower kit is ideal for low pressure

Min. pressure 0.2 bar

Excludes wall elbow

6. Spring dual function shower kit

SVKIT06 £139.01

Includes Square riser rail (brass), shower hose and Square dual function handset

Min. operating pressure 0.5 bar

Excludes wall elbow

7. Tide single function shower kit

SVKIT07 £132.00

Includes Square riser rail (brass), shower hose and Square single function handset

This shower kit is ideal for low pressure

Min. pressure 0.2 bar

Excludes wall elbow

8. Drench single function shower kit

SVKIT08 £75.46

Includes Square riser rail (brass), shower hose and Square single function handset

This shower kit is ideal for low pressure

Min. pressure 0.2 bar

Excludes wall elbow

SMARTFLOW BATH FILLER

Smart and unobtrusive, the Smartflow offers several features to bring a splash of high tech to the way you fill your bath.

A change from the conventional bath mixer, water enters the bath through the filler, which also acts as an overflow. A push-button click waste is also included.

Smartflow's versatility means it can be used with a dual inline valve as a simple bath filler, or connected to a triple inline valve, as shown on the left, allowing control of both bath and shower.

What's more, when used in conjunction with one of our thermostatic shower valves, you can be confident that you and your family can bathe in safety and comfort. The patented thermostatic cartridge within all Roper Rhodes valves maintains the selected temperature so that with a loss of either the hot or cold water pressure the valve will automatically shut down, therefore reducing the risk of injury by scalding. The cartridge ensures precise thermostatic control, maintaining your selected temperature to within $\pm 1.5^{\circ}\text{C}$. The valve is preset with a maximum temperature of 44°C .

Minimalistic and un-intrusive in design, the Smartflow bath filler is sure to blend with your bathroom's fittings.

Smartflow is solid brass in construction and chrome plated just like all of our shower and tap products.

Like the rest of our shower and tap products, Smartflow is offered with a ten year guarantee.

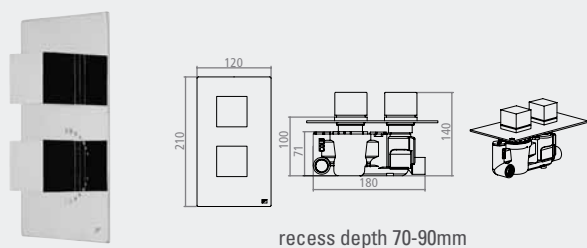

This product is compatible with our flow regulators, see page 197 for details.
